### QUESTION 1

Which of the following best describe the purpose of the long\_query\_time variable?

- A. It is used to tell the server when to log a query as slow.
- B. It is used to see the time it took the last longest query to run.
- C. It is used to tell the server after how many seconds to abort a query.
- D. It is used to tell the server the total CPU seconds that are allotted to a client connection before it shut down.

Correct Answer: A

---

### QUESTION 2

Which of the following best describes why InnoDB tables should always have primary keys and why they should be short?

- A. Because InnoDB uses primary keys to locate tables, and shorter keys make quicker lookups.
- B. Because InnoDB uses primary keys to locate table rows, and shorter keys make quicker lookups.
- C. Because InnoDB stores pointers in a log to all the primary keys and shorter keys make this log smaller.

Correct Answer: B

---

### QUESTION 3

Which of the following best describe some possible benefits of using RAID?

- A. Better user-level security.
- B. Data redundancy.
- C. Read performance gains.
- D. Write performance gains. E. Hot-swappable disk drives.
- E. Better memory and processor utilization.

Correct Answer:

---

### QUESTION 4
