QUESTION 1

A security administrator has informed you that during a security scan of the network one of the Solaris 10 systems were discovered to have most network services enabled. The security administrator has asked you to configure the system to meet the organizations security policy which only allows SSH and NFS traffic. Which command will best accomplish this task?

- A. svccfg apply /var/svc/profile/generic_limited_net.xml
- B. netserives limited
- C. svcadm milestone single-user
- D. service_profile limited

Correct Answer: B

QUESTION 2

System A has a file system that is being shared as follows:

```
-/data/dbase rw ""
```

System B mounts that file system so that users on systemB can use /data as a working directory for adding, changing, and removing files in the /data/dbase file system located on systemA.

Which answers describe the correct method of mounting the remote file system?

- A. mount -F nfs -o hard,intr systemA:/data/dbase /data
- B. mount -F nfs -o soft,intr,bg systemA:/data/dbase /data
- C. mount -F nfs -o hard,nointr,bg systemA:/data/dbase /data
- D. mount -F nfs -o soft,intr,bg,largefiles,logging,rw \ systemA:/data/dbase /data

Correct Answer: C

QUESTION 3

You have a Sun V880 server with twelve disk drives installed. You are trying to document the server hardware configuration and need to identify and document each disk drive that is installed. In addition, you want to note both the physical device name and the logical device name for each installed disk. Which two commands will display the physical device name along with the corresponding logical device name for each disk installed in the server? (Choose two.)

- A. ls -l /dev/dsk
- B. Use the dmesg command

- C. Use the prtconf command.
- D. In the format utility, from the main menu, select show
- E. In the format utility, from the main menu, select disk F. In the format utility, from the main menu, select verify

Correct Answer: AE
