QUESTION 1

You are building an educational games website for children. You have determined that your users respond best to large, colorful, easy-to-read buttons to navigate through the site. You've created a prototype of the navigation element, and want to make sure it meets your user's needs. What kind of testing should be performed at this stage?

- A. Positional testing
- B. Responsiveness testing
- C. Usability testing
- D. Functional testing

Correct Answer: D

QUESTION 2

The participatory design process includes which of the following techniques?

- A. Discovery, evaluation, prototype
- B. Surveys, testing, release
- C. Testing, review, redesign
- D. Analysis, design, prototype

Correct Answer: D

QUESTION 3

When starting a new project, many website designers develop a single page that includes all the fonts, sizes, white space, and colors they want. This becomes their page template for the rest of the site. Why is this practice important?

- A. It helps them determine which WYSIWYG code editor they should use.
- B. It insures they are properly separating the HTML5 coding from the CSS3 styling.
- C. It ensures the site has a consistent look and format.
- D. It proves the rest of the site will validate to current HTML5 standards.

Correct Answer: B

QUESTION 4

A large hardware retailer has a very large website, with many pages of do-it-yourself (DIY) tutorials, and product information. However, some customers are visiting the site to find the closest physical store. The development team has

elected to place a link for the Store Locator in the top right corner of the home page, but it will not appear on tutorial or ecommerce pages. What kind of navigational element is this?

- A. Breadcrumb
- B. Utility
- C. Secondary
- D. Primary

Correct Answer: B

QUESTION 5

Which of the following is a recommended method in the W3C standards in the operability category to improve accessibility of a web site on a tablet computer?

- A. Provide a virtual magnifying glass that enlarges portions of a website.
- B. Placing critical information at the top of the page.
- C. Provide adequate contrast to make onscreen content visible in bright environments.
- D. Provide workarounds for actions triggered by physically moving the tablet.

Correct Answer: B
