Operations troubleshooting Workbench.

Which tab should the administrator visit to get the required details?

- A. Metrics
- B. Alerts
- C. Logs
- D. Events

Correct Answer: A

QUESTION 5

An operator has been tasked with powering on a single virtual machine that has been onboarded, along with a number of additional virtual machines, into a single deployment within vRealize Automation. The virtual machine was onboarded in a powered-off state.

Which two actions could the operator take to complete the task? (Choose two.)

- A. Locate the deployment in vRealize Automation, and use the Power On Day 2 action.
- B. Locate the virtual machine in vRealize Log Insight, and use the Power On action.
- C. Locate the deployment in vRealize Operations, and use the Power on action.
- D. Locate the virtual machine in vRealize Operations, and use the Power On action.
- E. Locate the virtual machine in vRealize Automation, and use the Power On Day 2 action.

Correct Answer: BD
