QUESTION 1

Virtual extensible Local Area Networking (VXLAN) is an advanced network protocol supported by VMware and a wide range of hardware vendors. Which statement about VXLAN accurately describes its basic mode of operation?

A. VXLAN encapsulates layer 2 MAC frames into layer 3 UDP packets for transport across a physical IP network.

B. VXLAN encapsulates layer 3 MAC frames into layer 2 UDP packets for transport across a physical IP network.

C. VXLAN encapsulates layer 2 MAC frames into layer 3 TCP packets for transport across a physical IP network.

D. VXLAN encapsulates layer 3 MAC frames into layer 2 TCP packets for transport across a physical IP network.

Correct Answer: B

QUESTION 2

When explaining virtual networking to your manager which two points can you make thatdemonstrate advantages of virtual networks over physical networks? (Choose two.)

A. Virtual networks never need to be changed.

B. There is less reconfiguration of cables required.

C. There is less manual reconfiguration required.

D. There is less network hardware required.

Correct Answer: BC

QUESTION 3

What is the recommended minimum number of NSX controller nodes that should be deployed in any NSX implementation?

A. 2

B. 3

C. 4

D. 5

Correct Answer: C

QUESTION 4

An analysis of an existing network environment has determined that the time it takes to configure physical network hardware is impacting the ability to quickly make changes to the environment. Which statement best compares the time

required to make changes in physical and virtual network deployments?

A. Both types of changes take roughly the same length of time.

B. Physical network changes are eliminated in a virtual infrastructure.

C. Physical network changes take less time.

D. Virtual infrastructure changes take less time.

Correct Answer: B
