QUESTION 1

Your company has identified that change management to the physical network is time consuming and involves multiple IT support groups. NSX's capability to increase agility and speed up rapid deployment of services and changes to the virtualized network falls into what logical area?

- A. Security
- B. Automation
- C. Management
- D. Performance

Correct Answer: C

QUESTION 2

Which two NSX component are implemented within the hypervisor rather than by being deployed as virtual appliances? (Choose two.)

- A. NSX Load Balancer
- B. NSX Edge Gateway
- C. NSX Firewall
- D. NSX Controllers

Correct Answer: BC

QUESTION 3

When you are configuring multiple virtual machine networks on an ESXi host how can you arrange virtual machine port groups and vSphere Standard Switches?

- A. You can only configure multiple vSphere Standard Switches if you have more than four physical NICs in each ESXi host.
- B. You can only configure more than one network on an ESXi host by using multiple vSphere Standard Switches.
- C. You can configure more than one network using multiple virtual machine port groups on one or more vSphere Standard Switches.
- D. You can only configure one virtual machine port group per vSphere Standard Switch.

Correct Answer: D

QUESTION 4

Which statement represents a common use case for deploying NSX?

- A. NSX allows organizations to remove all physical network devices
- B. NSX provides rapid deployment of core services such as firewall and load balancing
- C. NSX provides simplified management of physical network devices
- D. NSX provides easier virtual machine deployment than traditional vSphere enabled data centers

Correct Answer: C
