### QUESTION 1

In which two ways can an administrator directly distribute VMware ThinApp packaged applications to users? (Choose two.)

- A. Deploy the application OVF using the vSphere Web client.
- B. Submit the file to the vSphere App Store for users to download
- C. Stream the application from a file server.
- D. Copy the application file locally and get the users to run it local

Correct Answer: AC

---

### QUESTION 2

An administrator is attending a planning meeting for a VMware Horizon (with View) deployment and is asked for a definition of end user computing?

How should the administrator respond?

- A. End user computing is the process of granting everyone administrator-level access to their virtual desktop.
- B. End user computing is maintaining the licenses for each software package used within the environment.
- C. End user computing is the process of life cycling everyone's physical desktop every three years.
- D. End user computing is the process of providing data access, regardless of the client platform.

Correct Answer: D

---

### QUESTION 3

Your manager has asked you to implement a VMware Horizon (with View) solution in your environment.

Which solution is best suited for a group of users where the desktop must be deleted and recreated after each use?

- A. Floating Pools
- B. Dedicated Pools
- C. Manual Pools
- D. Dynamic Pools

Correct Answer: D

---

### QUESTION 4

A company wants to deploy VMware Workspace Portal in its environment, but is concerned that users will be able use unauthorized applications. Which mechanism of VMware Workspace Portal prevents this behavior?

- A. Authorized user credentials are detected from Active Directory.
- B. Unauthorized access to applications is detected and the administrator is notified.
- C. User attributes are detected and policies are enforced across applications.
- D. Access to applications by default is not allowed. Each user must request access via the interface.

Correct Answer: C

---

#### QUESTION 5

Which statement represents a Customer Requirement that could be met by implementing a VMware Horizon (with View) deployment?

- A. We need to centralize access to common services and provide a uniform, secure, easy to manage image for employee access.
- B. We want to reduce the amount of hardware in our datacenter by making more.
- C. We are looking for an easy way to recover our user services in the event of unplanned downtime.
- D. We need to centralize our management functionality and be able to quickly and efficiently monitor our datacenter services.

Correct Answer: C
