#### QUESTION 1

Which of these allows static or dynamic grouping based on inclusion and exclusion of objects such as virtual machines, vNICs, cSphere clusters, and logical switches?

- A. uplink
- B. Active Directory (AD)
- C. Port
- D. Security group

Correct Answer: D

---

#### QUESTION 2

What are three common problems for administrators when managing application with network security models that are not virtualized? (Choose three.)

- A. Lack of Interoperability and automation creates error-prone manual work.
- B. Integration of third-party security products with home products is not possible.
- C. Deploying and managing third-party security products become difficult.
- D. Load balancing by vMotion is not possible.
- E. There is limited visibility into a workload's security posture and policies.

Correct Answer: ACE

---

#### QUESTION 3

What is the common practice that I followed when a new application is deployed in legacy networking?

- A. The application is mapped to users upfront.
- B. The physical network is updated by the network team each time.
- C. Recourse allocation is reconfigured based on the application requirement.
- D. Firewall and Intrusion Prevention System (IPS) solutions are switched off during the first deployment cycle.

Correct Answer: C

---

#### QUESTION 4

What are the two advantages of deploying NSX Edge load balancer in a network"? (Choose two.)

- A. Provides improved application availability in case of server failures.
- B. Enables application or service requests that are distributed across multiple back-end servers.
- C. Enables migration of virtual machines from one data to the other.
- D. Reduces the usage of public IP addresses in the network.

Correct Answer: BD

---

#### QUESTION 5

Which logical networking service does NSX Edge use to change source of destination IP addresses and TCP/UDP port numbers that are found in the flow of a packet header?

- A. Load balancing
- B. Dynamic Host Configuration Protocol (DHCP)
- C. Network Address Translation (NAT)
- D. VPN

Correct Answer: C
