QUESTION 1

Which NSX feature could increase the network security posture of an organization?

A. Desktop virtualization

B. Increased network traffic speeds between ESXi hosts

C. Guest Operating System virtualization

D. Distributed Logical Stateful Firewall engine

Correct Answer: D

QUESTION 2

Which feature of VMware vSphere enables configuration of startup and shutdown order for a multi-tiered application?

A. vApp

B. vSphere template

C. DRS Group

D. DRS Cluster

Correct Answer: A

QUESTION 3

A company wants to implement a software-defined network solution with minimal impact to the existing environment. What additional hardware, if any, is required when implementing VMware NSX?

A. A stateful inspection Firewall to take advantage of NSX\\'s built in Firewall protection

B. None. NSX is a completely non-disruptive solution.

C. Special VLAN configurations for accessing NSX.

D. At least two Layer 3 switches that must be converted to trunk mode.

Correct Answer: B

NSX is a completely non-disruptive solution which can be deployed on any IP network from any vendor ?both existing traditional networking models and next generation fabric architectures. The physical network infrastructure already in place is all that is required to deploy a software-defined data center with NSX.

QUESTION 4

Which VMware Cross-Cloud Architecture component can speed up and improve IT service delivery, improve IT operations, and deliver end-user choice with control across heterogeneous and multi-cloud environments?

A. VMware Workspace One

B. VMware vRealize Suite

C. VMware Airwatch

D. VMware Cloud Connector

Correct Answer: B

Explanation: Vmware vRealize Suite delivers a comprehensive enterprise-ready cloud management platform (CMP) that can speed up IT service delivery, improves IT operations, and delivers end-user choice with control, across heterogeneous, multi-cloud environments (vSphere and non-vSphere).
