QUESTION 1

In which node within Citrix Studio could a Citrix Administrator modify the operating system type for Machine Creation Services?

- A. Hosting
- B. Policies
- C. Controllers
- D. Machine Catalogs

Correct Answer: D

QUESTION 2

How could a Citrix Administrator add a XenApp 6.5 deployment to a XenDesktop 7.6 deployment so that both are manageable from within Citrix Director?

- A. Execute the DirectorConfig.exe tool on the Citrix Director server.
- B. Install a dedicated Citrix Director server for the XenApp 6.5 environment.
- C. Add the XenApp 6.5 Data Collector to the registry on the Citrix Director server.
- D. Add the name of the XenApp 6.5 Data Collector to service.AutoDiscoveryAddress in IIS.

Correct Answer: A

QUESTION 3

Scenario: A Citrix Administrator discovers that there has been a security breach that requires all users to change their password. However, users are NOT able to change their password through StoreFront. What should the administrator do to allow for password changes?

- A. Allow users to change passwords at any time.
- B. Allow users to change expired passwords only.
- C. Enable the password expired warning notification period.
- D. Enable the password change feature on the NetScaler Gateway.

Correct Answer: A

QUESTION 4

Which three options could a Citrix Administrator enable for users who connect to their provisioned desktop from Smart phones and tablets to improve their experience? (Choose three.)

- A. Legacy Graphics Mode
- B. Remote the combo box
- C. Automatic keyboard display
- D. Enhanced Desktop Experience
- E. Launch touch-optimized desktop

Correct Answer: BCE

QUESTION 5

SIMULATION

Scenario: A Citrix Administrator has prepared two server OS machines to host applications. The administrator used Machine Creation Services to provision the server OS machines. The server OS machines are part of the Windows 2012

Servers machine catalog. The Server 2012 Hosted Desktops and Applications delivery group is assigned to the Windows 2012 Servers machine catalog.

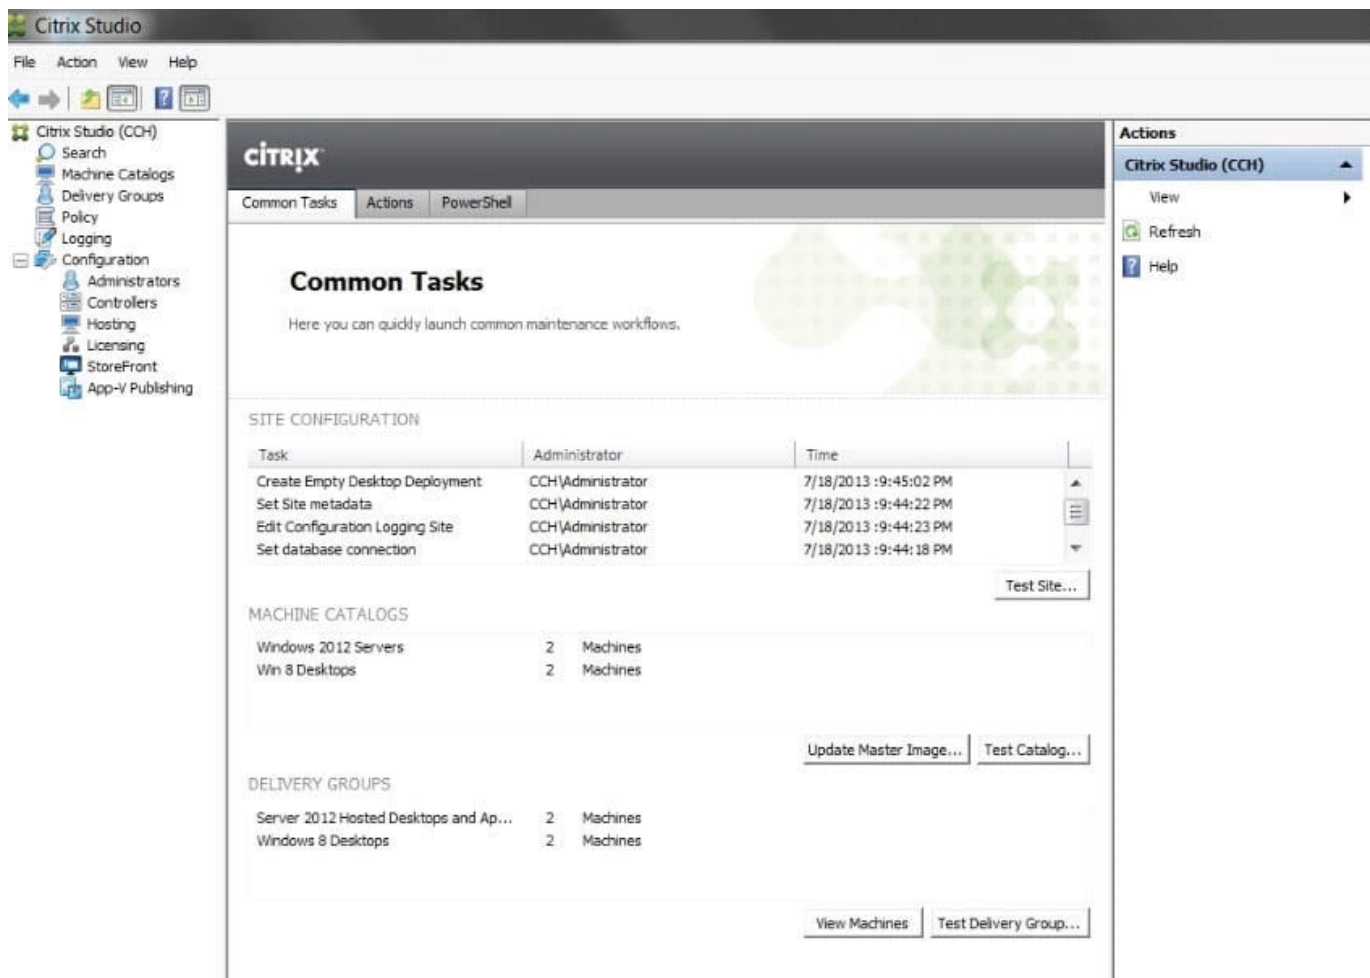

The administrator was instructed to roll out Firefox as a hosted application and has installed Firefox on the master server OS machine named Win2012-Master. Now, the administrator needs to update the server OS machines so that Firefox is

available as a hosted application to only the Finance user group through StoreFront or Citrix Receiver upon the next reboot of the server OS machines. The Finance user group is a member of the Server 2012 Hosted Desktops and

Applications delivery group.

Tasks:

Update the Windows 2012 Servers machine catalog to meet the requirements outlined in the scenario.

Correct Answer:

Update Machine Catalog

1) In Citrix Studio, highlight the "Citrix Studio" node at the top-left of the tree, under "Common Tasks" under the "Machine Catalog" section, highlight the Windows Server 2012 Machine Catalog and click on the Update master image button.

This will launch the "Update machine" wizard. (Note-the virtual machine should be powered off before updating to remove any locks.)

2) In the "Update Machine" wizard click on Next.

3) From the "Master Image" dialog window, select the Win2012-Master from the list of snapshots and virtual machines then click on Next.

4) From the "Rollout Strategy" dialog window, verify that the "On the next shut down (not right now)" option is selected and then click on Next.

5) From the "Summary" dialog window click on Finish. Update Delivery Group

1) In Citrix Studio, highlight "Delivery Groups" node at the top-left of the tree, select the Delivery Groups tab, highlight the Server 2012 Hosted Desktops and Applications delivery group, under the right-side "Actions" pane click on Add

Applications.

- 2) From the "Getting Started with Applications" dialog window click on Next.
- 3) From the "Applications" dialog window click on select Firefox from the list of "Selected Applications" or click on Add applications Manually and type in the path of the application then click on Next.
- 4) From the "Summary" dialog window click on Finish.
- 5) In Citrix Studio, highlight "Delivery Groups" node at the top-left of the tree, select the Delivery Groups tab, highlight the Server 2012 Hosted Desktops and Applications delivery group, under the right-side "Actions" pane click on View Applications. This will display the published applications available under the "Applications" tab.
- 6) Highlight Firefox under the "Applications" tab and then click on Properties under the right-side "Actions" pane.
- 7) From the "Application Settings" dialog window select Limit Visibility.
- 8) From the "Limit Visibility" dialog window select "Limit visibility for this application to the users listed below", click on Add Users, and the Finance group then click on Ok.
