QUESTION 1

Which three statements about Connection Leasing are true? (Choose three.)

- A. When a user logs on to Citrix Receiver, sessions are automatically reconnected.
- B. The feature can be enabled or disabled using the Set-BrokerSite PowerShell cmdlet.
- C. Only supported for server hosted applications and desktops and statically assigned desktops.
- D. Connections are cached by default for a lease period of three weeks.
- E. The lease cached can be viewed through the Get-BrokerLease PowerShell cmdlet

Correct Answer: BCE

QUESTION 2

Which tool should a Citrix Administrator use to monitor the overall daily performance of a XenDesktop infrastructure?

- A. Citrix Studio
- B. Citrix Director
- C. CDF Traces
- D. HDX Space Monitor

Correct Answer: B

QUESTION 3

Scenario: A Citrix Administrator plans to implement HDX Insight in an environment to troubleshoot intermittent issues. The administrator needs to know which components make up HDX Insight to ensure that all of the necessary pre-requisites are configured.

Which three components will the administrator need to review? (Choose three.)

- A. NetScaler Application Delivery Controller (ADC)
- B. Director
- C. NetScaler Management and Analytics System (NMAS)
- D. Web Insight
- E. NetScaler Gateway

Correct Answer: ABE

QUESTION 4

Scenario: A Citrix Administrator notices an intermittent latency issue within the XenApp and XenDesktop environment. The issue only involves external users entering through a NetScaler gateway.

The administrator reviews NetScaler logs, identifies the problem as a Networking issue, and now wants a more granular view of the data in order to isolate the issue further.

Which Citrix tool can the administrator use to view the network information?

- A. Configuration Logging
- B. HDX Insight
- C. Citrix Scout
- D. Citrix Diagnostic Tool Kit

Correct Answer: D

QUESTION 5

Scenario: A company maintains a XenDesktop infrastructure with a stand-alone license server. Recently, the license server had a hardware failure and can NO longer communicate on the network.

The license server has a valid license file with a current Subscription Advantage (SA) date on it.

What will happen to the XenDesktop environment with the license server now offline?

- A. Users will immediately be unable to connect to their resources.
- B. The license server will enter a 30-day grace period in which all user connections will work.
- C. Users will have limited connections available during a 30-day grace period.
- D. The license server will enter a 90-day grace period in which all user connections will work.

Correct Answer: B

Impact of Citrix License Server Becoming Unavailable

Need to understand the impact of the Citrix license server that holds the XenMobile licenses becoming unavailable. That is how will XM respond if the configured license server cannot be contacted for an extended period of time.

Answer: There is another "grace" period which kicks in once a license Server has been configured and a license detected which is not the same than the trial "grace period" which the document is referring. We keep a timestamp either on the local server or the common database when the license Service has been last available and if it becomes offline for some reason the clock starts ticking for 720 hours and this timer will reset if the license server becomes online again. So this is what would happen if the license server goes offline for some reason we would have 720 hours for amending the issue before the devices lose connectivity to the MDM server or XMS and once solved the problem the time would reset.
