QUESTION 1

Scenario: A Citrix Administrator configured Citrix ADC with multiple admin partitions, with different resources running one each. The administrator receives an SNMP alert stating `a Load Balanced Virtual Server is down`. When the administrator checks the Citrix ADC, the resource on the partition that was usually managed is NOT there.

Now, the administrator has to check each partition to find the load balanced virtual server that is down.

What can the administrator do to add the partition information to the SNMP traps to avoid this from happening in the future?

- A. Configure additional SNMP trap listeners.
- B. Change SNMP trap options.
- C. Add the partition information to the SNMP traps.
- D. Configure the SNMP Manager to send the partition information.

Correct Answer: C

Reference: <https://docs.citrix.com/en-us/netscaler/12/admin-partition/snmp-support-for-adminpartitions.html>

QUESTION 2

What must a Citrix Administrator do to encrypt XML traffic between StoreFront and the Delivery Controllers?

- A. Install a private server certificate on each StoreFront server and then add a new Internet Information Services (IIS) binding for HTTPS.
- B. Install a private server certificate on each Delivery Controller and bind the certificates to port 443.
- C. Install a private certificate on each Delivery Controller and StoreFront server. Restart each server to force XML communication to be encrypted.
- D. Install a private server certificate on each StoreFront server. Open the StoreFront console and use the https:// prefix with the base URL.

Correct Answer: A

QUESTION 3

Scenario: A Citrix Administrator maintains a Citrix Virtual Apps and Desktops Site with a number of network print servers being used for all users. Currently, the print servers use native Windows drivers. No client printers are being used. New company guidelines require a reduction in the number of native drivers being used within the Site infrastructure.

Which step can the administrator take to meet the new company guidelines?

- A. Enable the Citrix Universal Print Driver (EMF) driver and leave the default Universal printer driver usage policy

setting.

- B. Install the Universal Print Server on all print servers in the Site and leave the default Universal printer driver usage policy setting.
- C. Configure the Citrix Universal Generic Printer and update the Auto-create generic universal printer policy setting.
- D. Install the Universal Print Server on all print servers in the Site and update the Universal printer usage policy setting.

Correct Answer: C

QUESTION 4

A Citrix Administrator is in the process of installing Citrix Cloud Connector, but the installation fails. What could be causing the Citrix Cloud Connector installation to fail on the machine?

- A. It is in sync with UTC time instead of local time.
- B. Enhanced Security Configuration (ESC) is set to \\off\\.
- C. It cannot run on a machine template cloned across multiple machines.
- D. It is NOT joined to the domain.

Correct Answer: D

QUESTION 5

According to Citrix leading practices, what is the minimum number of Delivery Controllers required to deploy Citrix Virtual Apps and Desktops for 500 users?

- A. 1
- B. 2
- C. 3 D. 4

Correct Answer: B
