QUESTION 2

For which three reasons are connectors needed to create layers? (Choose three.)

- A. To export an elastic application layer
- B. To import a prepared OS image
- C. To deploy a packaging disk
- D. To import a prepared application layer
- E. To publish a layered image

Correct Answer: BCE

QUESTION 3

After an administrator restarts a XenApp server, the XenApp Administrator notices that the IMA Service is NOT starting.

Which two components could be causing the issue? (Choose two.)

- A. RPC Service
- B. Local host cache
- C. Citrix Streaming Service
- D. Remote Desktop Service

Correct Answer: AB

QUESTION 4

A Citrix Engineer needs to map a network drive for the HR user group, but does NOT want the network drive to be available to Windows XP users.

Which step can the engineer take within Workspace Environment Management (WEM) to complete this task?

- A. Add the Infrastructure Services server ADMX template to the Active Directory group policy and configure the network drive setting in a GPO. Then apply a filter to assign the No Client OS Match condition to Windows XP and assign the GPO to the OU containing the HR users.
- B. Add the network drive in the WEM environmental settings and apply the No Client OS Match condition to Windows XP. Then assign environmental setting to the HR user group.
- C. Use the Management Agent Host Configuration ADMX template to specify the network drive location. Then apply a filter to assign the No Client OS Match condition to Windows XP and a second filter to assign the Active Directory Group Match to the HR user group.
- D. Create an action mapping the network drive and apply the No Client OS Match condition to Windows XP. Then assign the action to the HP user group.

Correct Answer: D

QUESTION 5

When should a Citrix Engineer utilize the Processes WhiteList feature of Citrix Workspace Environment Management (WEM)?

- A. If specific administrators should be provided access to specific application or program processes
- B. If specific application or program processes should always be available for launching
- C. If specific users should NOT be able to launch specific application or program processes
- D. If specific application or program processes should NEVER be available for launching

Correct Answer: B
