QUESTION 1

How can a Citrix Engineer setup synchronization of subscription data between server groups using a replication schedule?

- A. Execute a Windows PowerShell command on the StoreFront server
- B. Make changes in the subscription file on the StoreFront server
- C. Make changes in the web.config file on the StoreFront server
- D. Use the StoreFront console

Correct Answer: B

Reference: <https://www.citrix.com/blogs/2015/02/19/storefront-synchronization-vip/>

QUESTION 2

Which type of application does the User Layer support?

- A. Applications that modify the network stack
- B. Applications that modify hardware
- C. Applications with boot level drivers
- D. Applications that contain add-ins

Correct Answer: D

Reference: <https://docs.citrix.com/en-us/citrix-app-layering/4/layer/enable-user-layers.html>

QUESTION 3

Which service on the StoreFront server is responsible for replication of user subscriptions?

- A. Citrix Configuration Replication
- B. Citrix Service Monitor
- C. Citrix Credential Wallet
- D. Citrix Subscriptions Store

Correct Answer: D

QUESTION 4

Scenario: A Citrix Engineer is maintaining a Citrix Virtual Apps and Desktops environment. The engineer recently deployed Citrix App Layering for improved image management with Machine Creation Services (MCS). The infrastructure requires various 32-bit and 64-bit operating system platforms.

Which three considerations does the engineer need to be aware of when creating various OS Layers for the company infrastructure? (Choose three.)

- A. Application and Platform Layers are directly tied to the operating system layer on which they were created.
- B. The ELM Repository storage maintains a maximum limit of 10 OS Layers that can be built and maintained on it at any given time.
- C. Before an OS version or layer can be deleted from the Citrix App Layering Management console, it must first NOT be in use by an existing template.
- D. The engineer needs a unique layer for each OS build created.
- E. The engineer does NOT need to create a unique OS Layer for 32-bit and 64-bit versions of the same OS type.
- F. When preparing the OS Layer, the engineer should NOT include any hypervisor tools or utilities within the OS Layer.

Correct Answer: ACE

Explanation:

Platform and Application Layers are tied to the OS Layer

Before a version or layer can be deleted, it must not be in use by a template

Have one Operating System layer per Operating System (Windows 7 32-bit, Windows 7 64-bit, etc.)

QUESTION 5

Scenario: A Citrix Engineer is maintaining a Citrix Virtual Apps and Desktops environment and has deployed Workspace Environment Management (WEM) within the infrastructure to provide resources to users in their sessions. The engineer initially deployed a Network Printer and it is working correctly for all users in their sessions. Recently, the engineer added a second resource, a Network Share Drive, and users are reporting that it is never available in their sessions.

The engineer verified the Action for this Network Share Drive to ensure it is correctly configured, and the required Conditions are listed under the WEM Filters node. The Everyone group has already been added to the Assignments node within the WEM console.

What should the engineer enable from the Advanced Settings node to correct this issue?

- A. The Agent Options to Enforce Network Drives Filters Processing
- B. The Agent Actions option to Process Virtual Drivers
- C. The Agent Actions option to Process Network Drivers

D. The Agent Options to Enforce Virtual Drives Filters Processing

Correct Answer: C
