QUESTION 1

Which two steps must a Citrix Engineer take to configure client certificate authentication on a NetScaler Gateway virtual server? (Choose two.)

A. Enable session reuse.

B. Set client certificate authentication to mandatory.

C. Disable multiplexing.

D. Set the user name field inside the Authentication profile to SubjectAltName:PrincipalName

Correct Answer: BD

QUESTION 2

Scenario: A Citrix Engineer created an automated action to notify users when the Pandora application is installed on their mobile devices. For testing purposes, the engineer installed the application on a mobile device but noticed that a notification was NOT received.

Which two XenMobile Server settings should the engineer check to resolve this issue? (Choose two.)

A. POP3

B. SMTP

C. IMAP

D. SMS

Correct Answer: BD

QUESTION 3

Scenario: A Citrix Engineer needs to publish a custom mobile application for iOS devices from the XenMobile environment.

Security requirements for the application are as follows:

-Clipboard must be disabled.

-

Application cannot be installed on jailbroken devices.

Which action must the engineer take to meet the security requirements stated in the scenario?

A.

Wrap the .ipa file using the MDX Toolkit for XenMobile and configure the MDX policies.

B.

Upload the .ipa file to the XenMobile Device Manager and create a deployment package to install the application on the user device during device enrollment.

C.

Upload the .ipa file directly to App Controller and require enrollment to the XenMobile Device Manager before users can register with the App Controller.

D.

Publish the application for employees using the Apple App Store and require that users download the application from the Apple App Store instead of the App Controller.

Correct Answer: A

QUESTION 4

In which way does implementing Worx PIN improve the user experience while maintaining Enterprise security?

A. It streamlines the user experience when the Active Directory password is changed.

B. It allows the user to use a unique, synchronized PIN for device and application access without modifying corporate password policy.

C. It reduces the number of times the user has to authenticate to launch managed applications.

D. It reduces the complexity of daily password entry without modifying corporate password policy.

Correct Answer: D

QUESTION 5

What are three reasons why a Citrix Engineer would tag a device? (Choose three.)

A. Enrollment invitations

B. Application deployment

C. Dashboard reporting

D. Policy deployment

E. Role-based Access Control

Correct Answer: BCD
