### QUESTION 1

Scenario: CGE acquires a small energy company that is running MGMT, a proprietary 16-bit application. A Citrix Architect is tasked with deploying this application to the Executives/Management end-user group. The CIO mandates that a FlexCast model must be chosen that resembles this end-user group's existing delivery strategy. It is important that a single-image deployment is utilized and that management effort is kept to a minimum for the update process. The availability of a fast rollback plan must also be available after upgrades, since it can often result in system instability. Why is deploying MGMT as Hosted VDI Static Persistent the best solution?

- A. It allows the installation of custom applications.
- B. It is easy to manage.
- C. It meets the high-performance application demands of the Executives/Management end-user group.
- D. It allows the Executives/Management end-user group to share desktops.

Correct Answer: C

---

### QUESTION 2

Why is manual image provisioning with SysPrep the appropriate image management process design for this environment?

- A. This design allows for user installed applications.
- B. This design reduces the time required to provision new machines.
- C. This design allows the use of local user profiles.
- D. This design supports the use of customized language packs.

Correct Answer: A

---

### QUESTION 3

Scenario:

A Citrix Architect is designing a multi-server Provisioning Services solution for CGE. The solution must be highly available and minimize the risk of vDisk inconsistency. Why does implementing RAID 10 satisfy the requirements?

- A. It provides striping and the highest performance.
- B. It minimizes disk space and provides the highest performance.
- C. It minimizes disk space and provides fault tolerance.
- D. It provides fault tolerance and the highest performance.

Correct Answer: A

---

#### QUESTION 4

What should a Citrix Engineer implement to allow users with pooled desktops to maintain persistent configurations, such as installation of new applications in their desktops?

- A. Personal vDisk
- B. Roaming profiles
- C. Folder redirection
- D. Personal network drives
- E. Citrix Profile Management

Correct Answer: C

---

#### QUESTION 5

Scenario:

CGE\\s security officer states that, for compliance reasons, all network traffic between Delivery Controllers, StoreFront servers, and NetScalers must be encrypted.

How should the architect recommend that L2TP be implemented?

- A. By using NetScaler
- B. By implementing secure Delivery Groups
- C. By configuring an Active Directory Group Policy to configure L2TP
- D. By installing a Windows Server OS with Routing and Remote Access Service

Correct Answer: D
