QUESTION 1

Scenario:

The Executives/Management end-user group accesses the Citrix environment while in the office using tablets and mobile devices. These end users have requested the ability to print documents from their Citrix session.

Which recommendation should a Citrix Architect make to fulfill this request while using the minimum number of printer drivers?

- A. Use client printing and the Universal Printer Driver.
- B. Use network printers connected with Citrix Policies.
- C. Use the Universal Print Server and Universal Printer Driver.
- D. Use network printers connected with Group Policy Preferences.

Correct Answer: C

QUESTION 2

Scenario: CGE acquires a small energy company that is running MGMT, a proprietary 16-bit application. A Citrix Architect is tasked with deploying this application to the Executives/Management end-user group. The CIO mandates that a FlexCast model must be chosen that resembles this end-user group's existing delivery strategy. It is important that a single-image deployment is utilized and that management effort is kept to a minimum for the update process. The availability of a fast rollback plan must also be available after upgrades, since it can often result in system instability. Why is deploying MGMT as a published application on Windows Server 2008 R2 with Machine Creation Services the best solution?

- A. It offers a faster change process.
- B. End users are already comfortable working in a shared environment.
- C. It prevents XenApp server crashes.
- D. It enables faster rollbacks.

Correct Answer: C

QUESTION 3

Some management staff print large documents over WAN connections.

What must the architect consider to optimize printing to a local printer from laptops?

- A. Configure session printers

- B. Configure Universal Print Server
- C. Disable `Direct connection to print servers\\`
- D. Allow mapping to all client printers to session

Correct Answer: D

QUESTION 4

The architect needs to evaluate the options for replicating user profiles across all sites. Which two pieces of information should the architect collect to analyze the options? (Choose two.)

- A. WAN traffic
- B. License requirements
- C. Storage infrastructure
- D. Database configuration

Correct Answer: BD

QUESTION 5

The company needs to define its management process for desktop image releases. Which tool should the architect recommend for the image management process?

- A. Provisioning Services
- B. Hypervisor templates and snapshots
- C. Windows Deployment Services
- D. XenConvert

Correct Answer: A
