QUESTION 1

Which three are always benefits of using a logical standby database?

- A. it can be used for database rolling release upgrades
- B. it can be used to replicate a single pluggable database (PDB) in a multitenant container database.
- C. It can be used as an updatable database for Real Application testing and then converted back to a standby database without affecting the updates.
- D. It can be used for reporting workloads requiring additional indexes or materialized views or both.
- E. It provides a disaster-recovery solution with switchover and failover options that can recover any data updated on the primary database.
- F. it can be used for testing patches without affecting the primary database.

Correct Answer: CDF

QUESTION 2

Examine the Data Guard configuration:

```
DGMGRL> show configuration;
```

```
Configuration -Animals
```

```
Protection Mode: MaxAvailability
```

```
Databases:
```

```
dogs- Primary database
```

```
sheep-Logical standby database
```

```
cats- Logical standby database
```

```
Fast-Start Failover: DISABLED
```

```
Configuration Status:
```

```
SUCCESS
```

Which three will be true after a switchover to Sheep?

- A. Cats will be an enabled logical standby database
- B. Cats will be a disabled logical standby database.

- C. Dogs will be a logical standby database.
- D. Dogs will be a physical standby database
- E. Sheep will be the primary database.

Correct Answer: ACE

QUESTION 3

Examine the Data Guard configuration: Configuration Status: SUCCESS

```
DGMGRL> show configuration verbose;
```

```
Configuration –Animals
```

```
Protection Mode: MaxPerformance
```

```
Databases:
```

```
cats- Primary database
```

```
dogs-(*) Physical standby database
```

```
sheep- Physical standby database
```

```
(*) Fast-Start Failover target
```

```
Properties:
```

```
FastStartFailoverThreshold = '30'
```

```
OperationTimeout = '30'
```

```
TraceLevel = 'USER'
```

```
FastStartFailoverLagLimit = '30'
```

```
CommunicationTimeout= '180'
```

```
ObserverReconnect= '10'
```

```
FastStartFailoverAutoReinstate= 'FALSE'
```

```
FastStartFailoverPmyShutdown= 'TRUE'
```

```
BystanderFollowRoleChange= 'none'
```

```
ObserverOverride = 'FALSE'
```

```
Fast-Start Failover: ENABLED
```

```
Threshold: 30 seconds
```

```
Target: dogs
```

```
Observer: 015.example.com
```

```
Lag Limit: 30 seconds
```

```
Shutdown Primary: TRUE
```

```
Auto-reinstate: FALSE
```

```
Observer Reconnect: 10 seconds
```

```
Observer Override: TRUE
```

Which two are true?

- A. The observer must run on host 015.example.com and is currently not running.
- B. The observer will reinstate Sheep automatically after a failover, if required.
- C. The observer will mark another standby database as the failover target if the original failover target becomes unavailable.

- D. The observer will detect if the primary database is unable to accept new connections
- E. The former primary database will not be reinstated automatically after a failover.

Correct Answer: BE

QUESTION 4

Which two are prerequisites for creating a standby database using Enterprise Manager cloud control?

- A. The primary database must have FORCE LOGGING enabled.
- B. The primary database must be in archive log mode
- C. A backup of the primary database must exist.
- D. The primary host and the proposed standby database host must run the same operating system.
- E. The primary database instance must be started using an SPFILE.
- F. The primary database must have flashback enabled

Correct Answer: AB

QUESTION 5

Which four requirements can be met by deploying a logical standby database?

- A. Support for workloads requiring additional indexes.
- B. it can be used to create additional schemas.
- C. it can be used to create additional tables.
- D. It must have the same physical structure as the primary database.
- E. it must provide a disaster-recovery solution that protects all data with capability of performing switchovers and failovers.
- F. Support for workloads requiring additional materialized views.
- G. it can be used for Real Application Testing without affecting the disaster recovery capabilities.

Correct Answer: ACEG
