### QUESTION 1

Which three types of backups taken in which situations may be used to perform restore operations to a logical standby database in a Data Guard environment?

- A. backups of data files taken on the primary database if connected to the recovery catalog where the logical standby database is registered
- B. backups of data files taken on the standby database if connected to the recovery catalog where the logical standby database is registered
- C. backups of control files taken on the primary database if connected to the recovery catalog where the logical standby database is registered
- D. backups of data files taken on the logical standby database, if not connected to a recovery catalog
- E. backups of control files taken on the logical standby database if not connected to a recovery catalog

Correct Answer: ADE

---

### QUESTION 2

Which four requirements can be met by deploying a logical standby database?

- A. Support for workloads requiring additional indexes.
- B. it can be used to create additional schemas.
- C. it can be used to create additional tables.
- D. It must have the same physical structure as the primary database.
- E. it must provide a disaster-recovery solution that protects all data with capability of performing switchovers and failovers.
- F. Support for workloads requiring additional materialized views.
- G. it can be used for Real Application Testing without affecting the disaster recovery capabilities.

Correct Answer: ACEG

---

### QUESTION 3

The Oracle database 12c Observer is currently running on host1 and you wish to have it running on host2.

Examine this list of possible steps:

- 1) Stop the observer on host1.
- 2) Disable Fast-Start Failover.

3) Update the broker configuration with the new observer hostname.

4) Enable Fast-Start Failover.

5) Start the Observer on host2.

Which contains the minimum required steps to move the observer to host2?

A. Execute only task 5.

B. Execute tasks 1, 3, and 5.

C. Execute tasks 1, 2, 3, 4, and 5.

D. Execute tasks 1 and 5.

Correct Answer: D

---

#### QUESTION 4

Which two are true about the creation of a Data Guard Broker configuration?

A. In a broker configuration, the primary database name must match the DB\_UNIQUE\_NAME value in the database initialization parameter file.

B. A primary database profile may be added to the configuration prior to creating the primary database.

C. A standby database profile may be added to the configuration prior to creating that standby database.

D. A newly created broker configuration requires at least one standby database profile to be specified at the time the configuration is created.

E. A newly created broker configuration is in the disabled state

Correct Answer: DE

---

#### QUESTION 5

Which two are true about database roles in an Oracle Data Guard Configuration?

A. A configuration consisting only of a primary and one or more physical standby databases can support a rolling release upgrade.

B. A Logical Standby Database can be converted to a Snapshot Standby Database.

C. A Logical Standby Database can cascade redo to a terminal destination

D. A Snapshot Standby Database can be a fast-start failover target

E. A Physical Standby Database can be converted into a Logical Standby Database.

Correct Answer: BE
