QUESTION 1

Which is true about security rules on a compute node?

- A. The port used for HTTPS connections is enabled by default based on a predefined security rule.
- B. A security rule can restrict IP addresses that can connect to a database instance on a compute node.
- C. A new database deployment on a compute node automatically enables a set of predefined security rules.
- D. New security rules can be defined to use only the TCP protocol but multiple port numbers.
- E. A compute node port can be enabled only if it is associated with an existing security rule.

Correct Answer: C

QUESTION 2

Which two are true about Oracle Database Cloud Service (DBCS)? (Choose two.)

- A. Third-party tools can be used with database instances in the cloud.
- B. Oracle-supplied tools can be used with database instances in the cloud.
- C. Database instances in the cloud can be accessed only by using SSH.
- D. DBCS only creates compute nodes; the Oracle Database software must be installed and the database created.
- E. Database instances in the cloud can be accessed only by using Oracle*Net.

Correct Answer: BC

QUESTION 3

Which two statements are true about the tablespace SEGMENT SPACE MANAGEMENT clause? (Choose two.)

- A. It applies only to tablespaces with uniform extent size.
- B. It overrides the DEFAULT STORAGE clause specified for a tablespace.
- C. It specifies whether used and free extents are tracked using free lists or bitmaps.
- D. It specifies whether users have direct control over space allocation for the objects in a tablespace.
- E. It applies only to permanent tablespaces.
- F. It applies only to smallfile tablespaces.

Correct Answer: CD

QUESTION 4

Which two are true about RETENTION GUARANTEE? (Choose two.)

- A. It is a tablespace attribute.
- B. It prevents FLASHBACK DATABASE operation failure.
- C. It prevents out-of-space errors.
- D. It prevents "Snapshot too old" errors.
- E. It is a static parameter.

Correct Answer: AB

QUESTION 5

Which two are true about instance recovery? (Choose two.)

- A. It is guaranteed to complete within fast_start_mttr_target number of seconds.
- B. Archived REDO log files are required to perform instance recovery.
- C. The database opens after the roll forward phase of instance recovery.
- D. It is performed when mounting a database.
- E. Archived REDO log files are never required to perform instance recovery.
- F. It occurs after a SHUTDOWN IMMEDIATE.

Correct Answer: AC
