### QUESTION 2

Your database instance is started by using an spfile. You want to modify the value of a static initialization parameter.

Examine these steps:

1.

Shut down the database instance.

2.

Modify the parameter in the spfile with scope = SPFILE.

3.

Modify the parameter in a pfile.

4.

Use the spfile to create a pfile.

5.

Use the pfile to create a spfile.

6.

Modify the parameter in the spfile with scope = BOTH.

7.

Start up the database instance.

Which are the minimum required steps in the correct order?

- A. 2, 1, 7
- B. 1, 7, 2
- C. 1, 2, 7
- D. 6, 1, 7
- E. 1, 4, 3, 5, 7

Correct Answer: C

---

### QUESTION 3

Which is true about the UNLIMITED TABLESPACE SYSTEM privilege?

- A. It can be granted to any user and any role.
- B. It is overridden by any specified user space quota.
- C. It allows a user to have unlimited space in any tablespace in the database.
- D. It allows a user to have unlimited space only in his or her default permanent tablespace.
- E. It can be revoked from a user and replaced with a specific space quota only if no user schema objects exist.

Correct Answer: C

---

### QUESTION 4

Which two are true about undo tablespaces? (Choose two.)

- A. They can be recovered only when an instance is in MOUNT state.
- B. They are always owned by SYS.
- C. They must have only one data file.
- D. There can be multiple active undo tablespaces for a single instance database.
- E. SYSDBA users can create objects in them.

Correct Answer: CD

---

### QUESTION 5

Which two are true about direct path load?

- A. It enforces only primary key, unique, and not NULL, constraints.
- B. DML statements may occur on tables being loaded.
- C. It fires insert triggers, if any.
- D. It writes only to blocks above the high-water mark.
- E. It uses the database buffer cache.

Correct Answer: BC
