QUESTION 1

Your company wants to define different status conditions for fulfillment lines that have different categories assigned to a single orchestration process in Order Management Cloud. Which two configurations would you perform to meet this requirement? (Choose two.)

- A. Define a fulfillment line status rule set for each category.
- B. Define orchestration process status values for each category.
- C. Assign the status catalog to the orchestration process.
- D. Create a unique step for each category and assign different "next expected task statuses".

Correct Answer: BC

QUESTION 2

Your customer is using Oracle Social Network for Order Management. They claim a conversation is being created for every order in the system, and that this is not required for automated order fulfillment. What can be changed so that Oracle Social Network only creates conversations for sales orders that need them?

- A. Remove access from users for certain orders that do not require conversations.
- B. When enabling the Sales Order object for Oracle Social Network, use the automatic mode.
- C. Disable the Sales Order object for Oracle Social Network.
- D. When enabling the Sales Order object for Oracle Social Network use the manual mode.
- E. Turn off all conversations in Oracle Social Network.

Correct Answer: D

QUESTION 3

You have deployed the Extensible Flexfield (EFF) successfully but it is not visible in the order capture additional information section. Identify the two reasons for this behavior. (Choose two.)

- A. The EFF segments are not defined correctly.
- B. The EFF context is not associated with the page.
- C. The custom extensible flexfields are not published.
- D. The EFF compilation is not done.

E. The EFF definition is not frozen.

Correct Answer: BC

QUESTION 4

Which three statements are true about the Visual Information Builder interface? (Choose three.)

- A. Pre-transformation rules and external integration routing rules can be created by using the Visual Information Builder interface.
- B. The Visual Information Builder interface is a simplified drag-and-drop rule editor.
- C. In the Visual Information Builder interface, you create external interface routing rules by using the "Manage External Integration Routing Rules for Sales Orders" page.
- D. In the Visual Information Builder interface, you create external interface routing rules by using the Manage External Integration Routing Rules page.
- E. Post-transformation rules and external integration routing rules can be created by using the Visual Information Builder interface.
- F. The Visual Information Builder interface is the same as the editor for Oracle Business Rules.

Correct Answer: ABD
