### QUESTION 1

An activity with an "Installation" work skill exists in a bucket and is ready to be routed.

The resource has nowork skills designated on his or her record, but qualifies for that activity in all other categories.

How does routing handle the assignment of this activity?

- A. Routing does not assign the activity to the resource and removes all assigned work that exists on that resource.
- B. Routing allows the activity to be assigned to that resource.
- C. Routing uses the work skill conditions to add the missing "Installation" work skill to the resource before assigning the activity to that resource.
- D. Routing failswith a "no resource with required work skills" error.

Correct Answer: C

---

### QUESTION 2

Which two statements are true regarding filter functionality within OFSC?

- A. Filters can be created where only certain User Types can see and interact with them.
- B. Filters can be used in conjunction with activities, resources, and inventory.
- C. If an activity filterhas two conditions, then an activity must meet at least one of the conditions in order to be filtered.
- D. After a filter has been created and saved, you cannot change the entity to which it is associated.

Correct Answer: AC

### QUESTION 3

When assigning work zones to field resources, each zone assignment can be either 'regular' or 'temporary' (override).

Which statement is accurate regarding how those types of work zone assignments interact?

- A. If a 'temporary' zone is assigned to a resource, then during it's configured date range, the resource will only be able to work in that zone, regardless of any other 'regular' assigned work zones.
- B. If a 'regular' zone is assigned to a resource, then during it's configured date range, the resource will only be able to work within that zone, regardless of any other 'temporary' assigned work zones.
- C. If a 'temporary' zone is assigned to a resource, then during it's configured date range, the resource will be able to work within that zone as well as within any other 'regular' assigned work zones.

D. If a 'regular' zone is assigned to a resource, then during its configured date range, the resource will be able to work within that zone as well as within any other 'temporary' assigned work zones.

Correct Answer: A

---

#### QUESTION 4
