QUESTION 5

Which fields are used to define static or dynamic list of values in web forms of process application?

A. Checklists, Radio button, or Select controls

B. Text Input and Area Fields

C. Date, Time, and Number Fields

D. Links, Email, and Message Fields

Correct Answer: A

https://docs.oracle.com/en/cloud/paas/process-cloud/user/configuring-advancedcontrols.html#GUID0A790FE5-AF8A-496D-A7C5-6C4203915B7C To configure static and dynamic list of values (for checklist,

radio button and select controls):

From the Basic Palette, drag and drop a checklist, radio button or select control onto the canvas.

Select the control and configure its static list of values on the Properties pane General tab.

Go to Option Source and click Static.

In the Option Names field, enter a label to display for each option.

In the Option Values field, enter an internal value for each option.

Specify a default value from the option values available in the Default Value field.

Select an option in the Autofocus field to make that option the selected option when the form loads.

Optionally, configure dynamic list of values for the checklist, radio button or select control. There are two

options to configure dynamic list of values.

Specify that the control\\\'s options should come from a list of value data attributes defined in the Data

definition pane.

Click From Data.

Select the list of values options source from available attributes in the Options List field.

Specify a default value from the options available in the Default Value field. ?Select an option in the

Autofocus field to make that option the selected option when the form loads.

Specify that the control\\\'s options should come from a REST connector created for the application.

Click Connector.

Specify the connector settings in the Connector, Resource and Operation fields and map response

settings. See Populating Controls Using REST Calls.

Select an option in the Autofocus field to make that option the selected option when the form loads.

Click Preview to try out using the control.
