QUESTION 1

What two tasks can a user with the Application Developer role perform?

A. Subscribe to a Plan.

B. Deploy to a Gateway.

C. Create an API.

D. Create an Application.

Correct Answer: CD

https://docs.oracle.com/cd/A58617_01/server.804/a58241/ch2.htm

QUESTION 2

You are designing a new integration in OIC that needs to expose a REST-full interface trigger for client

applications.

When choosing request and response options using the REST Adapter Endpoint Configuration Wizard,

which is a valid consideration?

A. Both standard and custom HTTP headers can be defined for either the request or response.

B. File attachments can be accepted as a request option for the Trigger interface, but you cannot include attachments as a response to the client.

C. If you select a PUT or POST action (HTTP method), you must define a JSON response payload format.

D. Although you can define both query and template parameters, only template parameters will be available for mapping in the mapper because query parameters are considered optional.

Correct Answer: C

QUESTION 3

Which three are scenarios where Managed File Transfer (MFT) is a valid approach?

A. Oracle MFT can be used in conjunction with Oracle Integration Cloud (OIC) to push files for processing by OIC.

B. Many SaaS applications still use files as a means for sharing data, so MFT capabilities are still very important.

C. File adapters remove the need to ever have to use MFT.

D. In integration scenarios where it is important to use either compression and/or encryption in the transfer process.

E. File Transfer is an old, outdated method of sharing information and should not be used.

Correct Answer: ABD

QUESTION 4

What are the four steps required to complete the task \\'create a connection\\'?

A. Configure Connection Properties

B. Import SSL Certificate

C. Test Connection

D. Select an Adapter

E. Configure Lookup

F. Configure Connection Security

Correct Answer: ACDF

Reference: https://docs.oracle.com/en/cloud/paas/integration-cloud-service/icsug/creating-connections.html#GUID10DBB72D-F6F9-4851-B2BA-9E593CF65F2E

QUESTION 5

What are the two types of analytics processors in Oracle Internet of Things (IoT) Cloud Service?

A. Batch Analytics Processors

B. Natural Analytics Processors

C. Static Analytics Processors

D. streaming Analytics Processors

Correct Answer: AD

https://docs.oracle.com/en/cloud/paas/iot-cloud/iotgs/understanding-analytics-processors.html he type of analytics processor to use depends on the nature of your data: Streaming Analytics Processors Use streaming analytics processors to analyze high volumes of rapidly changing data streamed from your sensors and devices. Streaming analytics processors are continuously running from the moment you deploy them, waiting for your devices to stream data. See Creating Streaming Analytics Processors. Batch Analytics Processors Use batch analytics processors to analyze large volumes of batch data. Typically, batch analytics processors process data stored in the Oracle NoSQL or other data sources. Unlike streaming analytics processors they are not continuously running, they only run when you call them using the REST API they expose.
