### QUESTION 1

You are tasked with creating a new integration in OIC that will be exposed to clients as a SOAP web service. In addition, this integration will be invoking an external SOAP web service as part of the orchestration flow logic.

In your creation of these SOAP adapter connection components, which is a valid consideration?

- A. You must explicitly specify the target server TLS version for the external web service outbound Invoke connection configuration.
- B. The WSDL URL property value can be defined by uploading a file for either the inbound Trigger connection or the outbound Invoke connection configurations.
- C. The SAML and OAuth security policies are available options for creating either the inbound Trigger connection or the outbound Invoke connection configurations.
- D. Suppress insertion of timestamp into the request and Ignore timestamp in the response message are optional fields only for the outbound Invoke connection configuration.

Correct Answer: D

#### QUESTION 4

As an Integration developer, you have been tasked with integrating Oracle Content and Experience Cloud with a process application. Because this is a document-centric process that will involve collaboration with process participants, it has been determined that the document and conversation functionality should be used.

Which task is NOT required?

A. You must manually enable the document and conversation features for your process application.

B. You will need to have the administrator configure the connection between Oracle Integration Cloud (Processes) and Oracle Content and Experience Cloud because developers do not have those permissions.

C. You will need to create a new process application because the conversation functionality cannot be enabled for pre-existing applications.

D. You will need to assign conversation viewers to either an Oracle Content and Experience user role or Oracle Documents Cloud Service user role.

Correct Answer: A
