QUESTION 1

You need to create an OIC integration that will be processing many records individually that are contained within a large file. You have been advised to use an implementation approach that includes using the Download File operation of an FTP adapter in conjunction with the Stage File action Read File in Segments operation to mitigate issues with memory consumption.

When using this approach, which is a valid consideration regarding the use of the Read File in Segments operation?

- A. The Read File in Segments operation allows for you to process the segments sequentially or in parallel.
- B. You must provide the actual filename because file references cannot be processed by the Read File in Segments operation.
- C. Segment sizes will default to 50 records but can be configured to any other segment size.
- D. You will need to explicitly configure a Scope action for this operation if you want to add additional actions during the processing of each segment.

Correct Answer: A

QUESTION 2

Which two actions can be repositioned in integration with Oracle Integration Cloud (OIC)?

- A. Function Call
- B. Switch
- C. Stage File with Read File in Segments
- D. Stage File

Correct Answer: AB

QUESTION 3

OIC integrations can be exported so that they can later be imported into another OIC instance environment.

Which statement is NOT true about the import and export of OIC integrations?

- A. Imported integration can be reconfigured to use different connection resources by using the OIC REST API
- B. Imported integrations cannot be immediately activated if their dependent connection resources are not already present in the target OIC environment
- C. Exported integrations will include all of their dependent connection resource information with the exception of URL and credentials.
- D. Integrations must be exported as package if you want to import them into another OIC environment.

Correct Answer: D

QUESTION 4

Which is a required prerequisites for API Platform Cloud Services?

- A. Storage Cloud Service and Compute Cloud Service
- B. Integration Cloud Service
- C. Database Cloud Service (DBCS) and Storage Cloud Service
- D. Java Cloud Service(JCS) and Database Cloud Service (DBCS)

Correct Answer: ABD

QUESTION 5

As a Process Cloud developer, you have been tasked with integrating Oracle Content and Experience Cloud with a process application. Since this is a document-centric process that will involve collaboration with process participants, it has been determined that the document and conversation functionality should be used.

Which task is NOT required?

- A. You will need to create a new process application since conversation functionality cannot be enabled for pre-existing applications.
- B. You must manually enable the document and conversation features for your process application.
- C. You will need to have the administrator configure the connection between Oracle Process Cloud and Oracle Content and Experience Cloud since developers do not have those permissions.
- D. You will need to assign conversation viewers to either an Oracle Content and Experience user role or Oracle Documents Cloud Service user role.

Correct Answer: A
