### QUESTION 1

Which two statements are true about accessing cloud-based storage through the storage API?

- A. It is a convenient way of storing data that is specific to your mobile application without having to go back to your backend systems to store it.
- B. All data retrieved from backend applications must be stored by the storage API in order to be consumed by the mobile application.
- C. It can act as a replacement for an Oracle Database instance, since it resides locally in the Mobile Hub environment.
- D. It is the principal way of retrieving data from backend, on-premises systems.
- E. It can make it easier to resume multi-step operations across devices by storing a user's progress.

Correct Answer: AD

---

### QUESTION 2

You have a web page and you need it to fetch data from a REST service when the page loads. How would you implement this in Oracle Visual Builder Studio (VBS)?

- A. Add an on-load event to the page settings and use an action to fetch the data.
- B. Add a button to the page to fetch the data from the REST service and mark it as default item.
- C. Create a process using Oracle Integration Cloud that will prepare the data in a background process.
- D. This cannot be accomplished with the current VBS version.

Correct Answer: B

---

### QUESTION 3

A page built using Quick Start will automatically be created with which of the below components?

- A. the page and UI components
- B. only the page
- C. the page, variables, actions, action chains, UI components, and page flows
- D. the page, UI components, and variables
- E. the page, UI components, REST end points, and page flows

Correct Answer: C

---

#### QUESTION 4

Which two statements are true about Agile Boards in Visual Builder Studio?

- A. The estimation type of a board can be Story Points or Target Weeks.
- B. In a Scrum board, tasks are broken into small actions to be completed in fixed duration cycles, called Sprints.
- C. In a Kanban board, tasks are managed with a focus on continuous delivery.
- D. A board is a metric that defines the relative effort of work and helps to understand the complexity of an issue.

Correct Answer: CD

---

#### QUESTION 5

You can configure SSL between clients and the load balancer used to access your Oracle WLS for OCI domain. There is an option Prepare Load Balancer for https that you can select when provisioning the domain. If you did not select this option when creating the domain, then you must perform manual tasks to configure SSL. Which task is not required to be performed?

- A. Create an HTTPS Listener for the load balancer.
- B. Add a certificate to the load balancer.
- C. Update the App Gateway for HTTPS (if the domain uses Oracle Identity Cloud Service).
- D. Allow ingress traffic in port 80 only on a security list for the load balancer.

Correct Answer: D
