QUESTION 1

You are setting up a scheduler profile for a manager, but you cannot find this manager in the Group Manager list.

What are three reasons for this?

A. This manager is not identified as a Line Manager in his HR record.

B. This manager\'s hire date is later than the scheduler profile effective start date.

C. You didn\'t run the Refresh Manager Hierarchy job.

D. This manager doesn\'t have the Time and Labor Manager role.

Correct Answer: BCD

The Refresh Manager Hierarchy process populates the denormalized manager hierarchy table when person records are migrated from other applications. Otherwise, whenever a change is made to a person\'s manager hierarchy, the change is reflected automatically in the denormalized manager hierarchy table. However, by running the Refresh Manager Hierarchy process in addition to these automatic individual updates, you can ensure that the denormalized manager hierarchy is as accurate as possible. Refresh Manager Hierarchy processes all types of manager hierarchies.

QUESTION 2

How should you enable population of the Supplier Device Event list of values in mappings?

A. By defining a value set to list the supplier events

B. By defining the value of the supplier in the TCD suppliers lookup first, and then the values of the supplier events in the TCD Supplier Events lookup

C. By defining the values in the TCD Supplier Events lookup only

D. By doing nothing. The list of events is defaulted with one In event and one Out event.

Correct Answer: B
