QUESTION 1

Which statement is true about BTRFS RAID?

- A. Btrfs RAID is a multi-disk software RAID providing the same functionality as a software RAID created using the mdadm command.
- B. Btrfs RAID is block device RAID.
- C. Btrfs RAID is mirroring block devices.
- D. Btrfs RAID just ensures that for every block, there are "x" number of copies.

Correct Answer: B

QUESTION 2

Which three statements are true about conversion to btrfs file systems? (Choose two.)

- A. If you roll back a btrfs conversion, you lose any changes that you made to the btrfs file system.
- B. You must run fsck to check and correct the integrity of the file system before converting it to btrfs.
- C. You can convert a bootable partition, such as /boot, to a btrfs file system.
- D. Converting the root file system is not possible by using the btrfs convert utility.
- E. If you delete the snapshot of an original file system to save storage space, you can still recover the original file system.
- F. The btrfs-convert utility converts an ext2, ext3, or ext4 file system to btrfs.

Correct Answer: AF

QUESTION 3

For which domain or domains does the default cache-only nameserver have a list of authoritative servers in the /var/named/named.ca file?

- A. the domain to which the cache only nameserver belongs
- B. the root domain
- C. the domains to which the local DHCP servers belong
- D. the domains to which the local DNS servers belong

Correct Answer: B

QUESTION 4

What are two ways to invoke the rescue procedure for Oracle Linux while booting from the installation media?

- A. Press the Esc key on the Oracle Linux Boot Menu screen.
- B. Press the Esc key on the grub loader menu.
- C. selecting "Rescue Installed System" on the Oracle Linux Boot Menu screen.
- D. selecting "Rescue Installed System" on the grub loader menu.
- E. Press the Shift+Ctrl keys on the grub loader menu.
- F. Press the Shift+Ctrl keys on the Oracle Linux Boot Menu screen.

Correct Answer: CF

QUESTION 5

Examine the command sequence and the output produced:

```
[root@EDFAR9P0 ~]# tgt-admin -s | egrep -i 'target|lun'
Target 1: ign.2013-03.com.example.mypc:1
  LUN information:
    LUN: 0
    LUN: 1
[root@EDFAR9P0 ~]# tgtadm -m logicalunit -o delete --tid 1 --lun 1
[root@EDFAR9P0 ~]# tgtadm -m target -o delete --tid 1
```

Which statement is true?

- A. The tgtadm commands succeed and effect both the configuration in /etc/tgt/targets.conf and the running configuration.
- B. Both tgtadm commands succeed. No changes are made to the configuration file.
- C. Only one tgtadm command succeed. The deletion of target 1 fails because LUN 0 has not been deleted.
- D. Both tgtadm commands succeed. The tgtadm commands issued affects the ctatic configuration only and do not affect currently accessed target/LUN combinations.

Correct Answer: C
