QUESTION 1

You are implementing retropay. You have created a retroactive event group to track the changes that need to be considered by the retropay process. To which feature should the retroactive event group be associated?

- A. Element
- B. Payroll definition
- C. Work relationship records
- D. Payroll relationship records

Correct Answer: A

Reference: https://docs.oracle.com/cd/E51367_01/globalop_gs/FAIGP/F1427200AN19C77.htm

QUESTION 2

You want to give a user access to run a specific shipped payroll process or report. Which three actions should you perform?

- A. Define a payroll flow security profile that includes the flow for the specific process or report, and then assign it to the data role attached to the user.
- B. Give the user the functional privilege to run the specific process or report through a job or abstract role.
- C. Enable the process or report on the Manage Payroll Flow Pattern page.
- D. Regenerate the data role attached to the user.

Correct Answer: ACD

QUESTION 3

You defined the department costing information after the Calculate Payroll process is run that creates the costing results also. You noticed that the department costing information is not created for the employees who are in that department. What should you do to ensure the department costing information is reflected for those employees without rolling back and rerunning the Calculate Payroll?

- A. You roll back only the costing process and rerun it.
- B. You run the Calculate Retroactive Costing process to recalculate costs for retroactive changes to costing setups.
- C. You cannot rectify the costing results after they are created.
- D. You do the adjustments in General Ledger because you cannot do changes in the costing results.

Correct Answer: B

QUESTION 4

A customer wants to distribute the costs of a benefits element, which is at payroll relationship level, to employee earnings. How should you define the costing rules to meet this requirement?

- A. Create the costing of type "Costed" and because it is a relationship level element, it automatically distributes the costs over earnings elements.
- B. Create a distribution group with earnings elements and create the distributed costing on relationship level element.
- C. you cannot distribute the costs of an element.
- D. Create the costing as Fixed Costed on payroll relationship level element, because the element is at relationship level. It automatically distributes costs for earnings elements, which are at assignment level.

Correct Answer: B

QUESTION 5

You are currently reconciling a payroll run and are informed of a late starter who you would like included in the payments part of the main processing flow. Which feature should you use to achieve this?

- A. Connecting Flows
- B. Flow Linkage
- C. Flow Interaction
- D. Calling a Flow

Correct Answer: C
