QUESTION 1

There is a business requirement to display supporting information with some text and source value at the journal line level that will vary depending on the entered amounts for the line.

What is the solution to implement this requirement?

- A. define line description rule with condition
- B. define journal line rules with conditions
- C. define journal entry rule set with condition
- D. define user transaction line identifier

Correct Answer: A

QUESTION 2

Given the business use case:

\\New Trucks\\ runs a fleet of trucks in a rental business in the U.S. The majority of the trucks are owned; however, in some cases, \\New Truck\\ may procure other trucks by renting them from third parties to their customers. When trucks are leased, the internal source code is \\L\\. When trucks are owned, the internal source code is \\O\\. This identifies different accounts used for the Journal entry. Customers sign a contract to initiate the truck rental for a specified duration period. The insurance fee is included in the contract and recognized over the rental period. For maintenance of the trucks, the "New Trucks" company has a subsidiary company \\Fix Trucks\\ that maintains its own profit and loss entity. To track all revenue, discounts, and maintenance expenses, \\New Trucks\\ needs to be able to view: total maintenance fee, total outstanding receivables, rental payment discounts, and total accrued and recognized insurance fee income.

How do you calculate discounts for use in the accounting rule?

- A. Use flexfield
- B. Use custom formulas
- C. Use mapping set rules
- D. Use analytical calculations

Correct Answer: B

QUESTION 3

Given the business use case:

\\Insurances for Homes\\ company provides home insurance services. They have an in-house built system that processes insurance payments received from customers. The end result of the process consists of a listing of individual journal entries in a spreadsheet. They have requirements for getting all Journal entries in a secure and auditable repository. Access will be limited to selective staff members. Additionally, the company needs to be able to report and

view the entries using advanced reporting and analytical tools for segmenting, viewing and understanding data in the journal entries.

The line information may contain more than one line for the same header.

When uploading transactions, which is a way to differentiate each Journal line?

- A. Assign a custom formula.
- B. Assign an accounting attribute.
- C. You do not need to do anything additional.
- D. Assign a line classification or line type attribute.

Correct Answer: D

QUESTION 4

\\'Insurances for Homes\\' company provide home insurance service. They have in house built system that processes home insurance payments received from customers. The end result of the process consists of a listing of individual journal entries in a spreadsheet. They have requirements for getting all journal entries in a secure and auditable repository. Access will be limited to selective staff members. Additionally, be able to report and view the entries using an advanced reporting and analytical tools for slicing and dicing the Journal entries.

Insurance premium is to be recognized as income across the-coverage period of the insurance policy. How do you link the two journal lines in the recurring journal entries cases, so that these two journal lines are identified by the accounting process to create recurring Journal entries?

- A. Recognition Journal class
- B. Recurring Journal class
- C. Accounting class
- D. Multiperiod class

Correct Answer: D

QUESTION 5

What kind of sequence can be assigned to subledger journal entries at the time that the journal entries are created in final mode?

- A. Reporting Sequence
- B. Accounting Sequence
- C. Journal Entry Sequence
- D. Document Sequence

Correct Answer: B
