### QUESTION 1

How can you deliver a forecast for drop shipments?

- A. It cannot be done at this time.
- B. Generate manually using Planning Analytics
- C. Excel upload using File Based Data Import Process
- D. Create based on the supplier performance for drop shipment collection
- E. Create based on the drop shipment or booking history; the ship from will be the drop ship validation organization

Correct Answer: E

---

### QUESTION 2

A supply plan has just been run that contains a configured item. You notice that the sourcing rules of the base model were used instead of sourcing rules for the configured item. Why did this happen?

- A. No sourcing rules have been defined for the configured item.
- B. The sourcing rules of the base model overrode the sourcing rules of the configured item.
- C. It is not possible to create sourcing rules for the configured item; all configured items always use the same sourcing rules as the base model.
- D. The sourcing rules of the base model had a priority of 1, while the sourcing rules of the configured item had a priority of 2.
- E. No planning percentages were defined at the operation level within the work definition.

Correct Answer: A

---

### QUESTION 3

Where do you view the collected data for Organizations, Customers, Suppliers, Carriers, and Interlocation Shipping Networks?

- A. View Simulation Sets
- B. Review Plan Inputs
- C. Maintain Supply Network Model
- D. View Collected Data
- E. Planning Analytics

Correct Answer: C

---

#### QUESTION 4

A customer has created a supply plan based on current requirement. Due to changes in third party forecast, the plan must be rerun with these recent updates. However, while this new information became available, existing supply like on-hand inventory and work order completions have also been updated.

Which data refresh option should be used to reflect all these changes in the plan?

- A. Do not refresh with current data
- B. Refresh with quick refresh option
- C. Refresh with forecast data
- D. Refresh with selected current data
- E. Refresh with current data

Correct Answer: E

---

#### QUESTION 5

Which three statements are true about a drop ship validation organization? (Choose three.)

- A. It is the source for organization-item attributes when creating drop ship planned orders.
- B. It can be a Cost Organization.
- C. It is not required in order to use drop shipments.
- D. It cannot be an item organization.
- E. It is a proxy for the organization during the collections of drop ship sales orders and drop ship history.
- F. It can be an item organization.

Correct Answer: AEF

Use the drop ship validation organization for the following purposes:

- As the source for organization-item attributes when creating drop ship planned orders
- As a proxy for the organization for drop ship forecasts and manual demands
- As a proxy for the organization during the collections of drop ship sales orders and drop ship history

Specify the drop ship validation organization when you generate a forecast or create a manual demand. Drop ship sales order bookings and shipments history are collected with the drop ship validation organization when items are shipped from the warehouse. Demand forecasting can create forecasts for the drop ship validation organization and release the forecasts for planning supplies.

The drop ship validation organization can be the item master for a source system, but it is not required.

 **Note:** The drop ship validation organization must be an item organization. When you set up the drop ship validation organization, if the item master holds any transactions, create a new drop ship validation organization.
