QUESTION 1

What does a slot component reserve space in a layout to display?

- A. a widget determined in real-time based on variable criteria
- B. an ordered set of widgets specified in a tabular format
- C. the header or footer of a page that contains configurable elements
- D. a group of related widgets that constitute a composite shopper-based function

Correct Answer: A

QUESTION 2

A developer is customizing the payment methods widget to enable the shopper to store a credit card when checking out. The widget needs to add three properties to the payments object of the JSON authorization request when creating the

order:

saveCard(Boolean)

nickname(String)

setAsDefault(Boolean)

Each of the properties needs to be bound to a particular view model for the properties to be added to the payments object.

Which is the correct view model?

- A. orderViewModel
- B. widgetPaymentViewModel
- C. cartViewModel
- D. paymentViewModel

Correct Answer: B

QUESTION 3

Which three features are supported in a B2B Storefront implementation? (Choose three.)

- A. A displaying products and prices that are specific to the logged in contact's account
- B. managing account buyers and addresses on the storefront by contacts with account specified storefront roles

- C. simultaneously logging into multiple accounts in order to compare product items and prices
- D. requiring an order approval based on a specified price threshold associated with the account
- E. sharing a purchase list with a contact from another account

Correct Answer: BCD

QUESTION 4

Which three design elements are provided in each baseline provisioned environment? (Choose three.)

- A. a basic collection of component instances that include widgets, stacks, and slots
- B. sample catalog data including product collections and SKUs
- C. storefront style templates with a set of pre-defined sample themes
- D. storefront template called Cloud Lake with a set of default layouts
- E. provisioned data used for sample shopper profiles

Correct Answer: ABE

QUESTION 5

Your customer has a B2B Storefront instance designed to have three English language sites: North America, European Union, and Asia.

What two components will the storefront developers need to configure to support one or more sites? (Choose two.)

- A. The settings for each layout to specify one or more sites valid for that layout
- B. Associated component text snippets that are valid for each site
- C. The layout components to include branding, images, and page content that are specific for the site
- D. The profile Navigation

Correct Answer: CD
