B. to support Firefox browsers only

C. to support Chrome browsers only

D. to support iOS devices using Safari

Correct Answer: AD

QUESTION 2

Consider the following code from the widget.json for a sample custom widget: For which pages will the widget appear in the Component library in the Design page in the Administration UI?

```
{
    "glcbal": false,
    "availableToAllPages": true,
    "javascript": "myCustomWidget",
    "jsEditable": true,
    "i18nresources":"myCustomWidget",
    "config": {},
    "imports": [],
    "minWidth": 4,
    "hiddenFromSiteStudio": false,
    "translations": [
        {
            "language": "en",
            "name": "My Custom Widget"
        }
    ],
    "version": 1
}
```

A. The widget will appear for all pages

B. The widget will appear for all global pages only

C. The widget will not appear for any pages

D. The widget will appear for all product pages only

Correct Answer: D

QUESTION 3

What does a storefront extension package contain?

A. All the JavaScript, HTML template, CSS, localization resources, and configuration parameters that define, implement and support the component

B. A copy of the JavaScript, HTML template and CSS resources from the Commerce Cloud source code repository

C. A pointer to the location of the definition of the component

D. A collection of the 3rd party JavaScript libraries that may be referenced by the component

Correct Answer: A

QUESTION 4

You need to develop an integration with an analytics platform that tracks shopper activity across all Commerce Cloud pages and provides its own JavaScript library. Which statement describes how you can implement this use case in Commerce Cloud?

A. Create a custom non-global widget that includes the analytics JavaScript library and upload to Commerce Cloud as a Storefront extension which will automatically apply to all layouts.

B. Create a custom global widget with a display template that includes an inline script reference to the analytics JavaScript library and upload to Commerce Cloud as a Storefront extension.

C. On the "Application-Level JavaScript" tab on the Settings Page, add the URL for the analytics JavaScript library so that it will automatically apply to all layouts.

D. Create a custom global widget that includes the analytics JavaScript library and upload to Commerce Cloud as a Storefront extension.

Correct Answer: B

QUESTION 5

Which is NOT a step involved in creating widget configuration settings?

A. Define the configuration settings string resources for all supported locales

B. Update widget template and JavaScript code to use the configuration parameters as required

C. Define the configuration settings in a config.json file

D. Compile the configurations before the widget extension is uploaded

E. Add the widget configuration settings folders and files to the widget extension structure

Correct Answer: D
