QUESTION 1

Which two statements about message translation in a skill are true?

- A. If auto-translation is enabled and a component has its translate property set to false, then the component output message or level will not get auto-translated to the detected user languages.
- B. A system.Output component that reads its text message from a resource bundle does not require auto-translation or its translate property set to true to display translated.
- C. A missing system. DetectLanguage state in a dialog flow causes an exception for components that read their output message from bundle.
- D. For the System.Translateinput component to work, it requires a previously executed system.DetectLanguage component state.
- E. Enabling auto-translation in a dialog flow does not translate the user input message.

Correct Answer: BC

QUESTION 2

Which two statements describe what happens when a System.DatectLanguages component is used in a dialog flow?

- A. The system.DetectLanguage component sets the profile.languageTag variable to the language code of the detected user language.
- B. The system. DetectLanguage component sets the autoTranslate variable to the language code of the detected user language.
- C. A system.DetectLanguage component state causes an exception if no translation service is configured for a skill.
- D. The system.DetectLanguage component sets the profile.locale variable to the language code of the detected user language.
- E. The system.DetectLanguage component does not detect English because it is the default language.

Correct Answer: AD

QUESTION 3

You have a digital assistant with a pizza skill. While ordering a pizza, the user triggers the digital assistant's Help system intent by entering "help". What is the default functionality of the digital assistant assuming no help functionality has been implemented in the pizza skill?

- A. The digital assistant displays a prompt and a card which can be configured to show examples of what the skill can do.
- B. Nothing. You need to explicitly define a help state in the pizza skill.
- C. The digital assistant displays the information contained in the Description field of the skill.

D. The digital assistant displays a dialog to confirm if the user wants help. If the user selects "yes", the skill returns to the system, intent and awaits user input.

E. The current conversation stops and the skill returns to the system, intent and awaits user input.

Correct Answer: D

QUESTION 4

Which variable type is automatically set with values from the chat client, such as locate and timezoneoffset?

A. System variables

B. Variables that are defined in the context section in the dialog flow

C. User variables

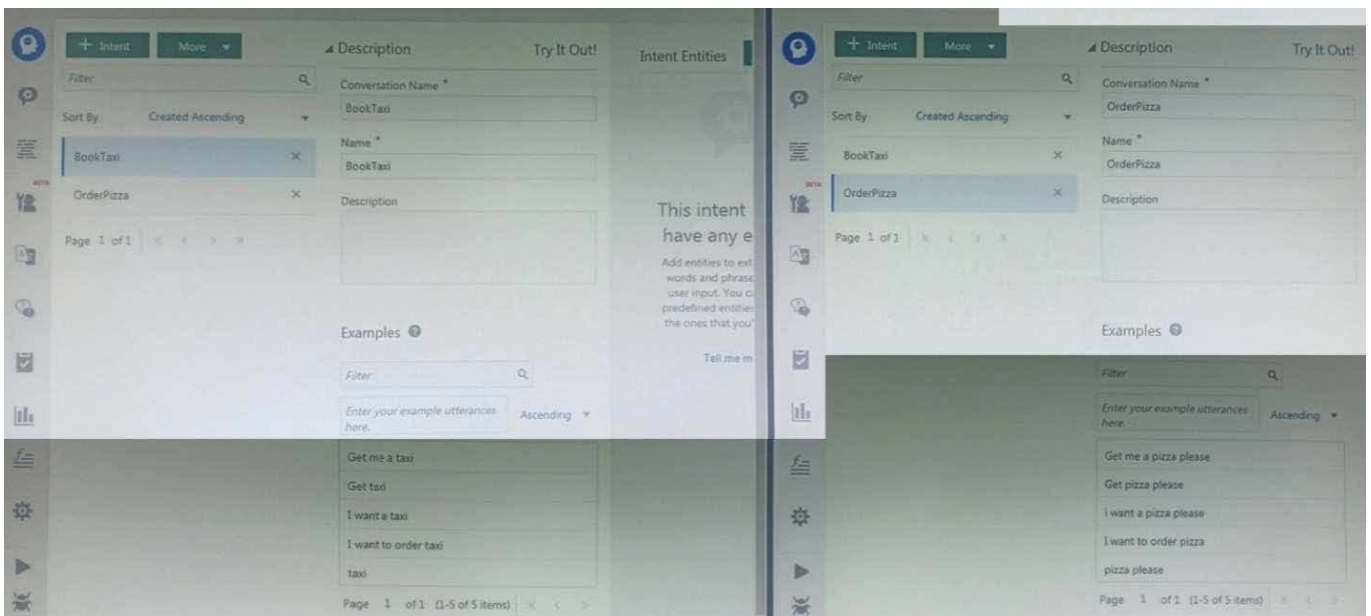

D. System.config variables

E. Profile variables

Correct Answer: D

QUESTION 5

View the Exhibit.

You have been asked to review a skill for its readiness to go live. Which four issues would you raise as a priority?

A. The unresolvedIntent has not been trained.

B. The utterances have too much commonality.

- C. All utterances should start with an uppercase letter and end with a period.
- D. The word "please" may inadvertently skew the results.
- E. You should never have single-word utterances.
- F. The number of utterances looks to be too low and artificial for a go-live.

Correct Answer: ABDF
