### QUESTION 1

Consider this code snippet:

```
webview:  
  component: "System.Webview"  
  properties:  
    sourceVariableList: "fullname, amount"  
    variable: "outputfromweb"  
    prompt: "Tap the link to file your dispute."  
    service: "DisputeFormService"  
  transitions:  
    next: "output"
```

Which two statements about this code are true?

- A. The system.webview component acts a gateway to a web app by naming the Webview service,
- B. e., DisputeFormService, in the code snippet.
- C. If the web app returns any values, the System.webview component will store them in the outputfromweb variable.
- D. This code snippet supports only one variable as a return value from the web application. When there are multiple return values, they need to be comma-separated. For example: variable: "outputfromweb1, outputfromweb2 M
- E. The web app returns two values and will store them in the fullname and amount variables, respectively.

Correct Answer: AB

---

### QUESTION 2

Within your digital assistant, you notice that the user input "tell me my balance" immediately initiates the Banking skill. However, it does not offer the user the option to consider that the request could be handled by the Retail skill, which also offers the ability to check the balance in your retail account.

How should you ensure that both the banking and retail skills are considered in this case?

- A. Raise the Candidate Skills Confidence Threshold in the digital assistant.
- B. Lower the Confidence Threshold in the Retail skill.
- C. Lower the Candidate Skills Confidence Threshold in the digital assistant.
- D. Lower the Confidence Threshold in the Banking skill.

Correct Answer: C

---

### QUESTION 3

What statement correctly describes the Authentication Service in Oracle Digital Assistant?

- A. The Authentication Service authenticates users to Oracle Identity Cloud Service. It provides customizable login screens that are displayed in the context of a user-bot conversation.
- B. The Authentication Service holds the identity provider configuration that is used at run time in Oracle Digital Assistant to retrieve an access token that authorizes REST service calls.
- C. The Authentication Service authenticates Oracle Digital Assistant users to a social media identity provider (for example, Facebook) and associates social media accounts with accounts stored in the Oracle Identity Cloud Service.
- D. The Authentication Service allows bot designers to configure a custom webhook to authenticate and authorize users using the System.OauthAccountLink component.

Correct Answer: D

---

### QUESTION 4

You install Oracle Bots Node SDK from GitHub to develop a new custom component service. Which command, when issued on a command line or terminal window, creates a new custom component service project in the current directory?

- A. bots-node-sdk service
- B. bots-node-sdk service init
- C. bots-node-sdknpm install
- D. bots-node-sdkservice init

Correct Answer: D

Create the Custom Component Package Use the SDK's command line interface (CLI) to create the necessary files and directory structure. To create the package folder, and the necessary contents, type the following command in a terminal window: bots-node-sdkservice init

### QUESTION 5

Which statement is true regarding the effect of context pinning on routing?

- A. If the input includes an implicit invocation for a skill, the router pins the conversation to that skill.
- B. If the user is pinned to a skill and then enters something that doesn't relate to that skill, the router automatically checks other skills for a match.

C. The thresholds that determine whether context pinning will occur or not set at the skill level.

D. For user input that includes an explicit invocation for a skill, but not intent-related utterance, the router pins the conversation to the skill. The next utterance, the router pins the conversation to the skill. The next utterance is assumed to be related to that skill.

Correct Answer: D
