QUESTION 2

You are designing a lab exercise for your team that has a large number of graphics with large file sizes.

The application becomes unresponsive if the graphics are embedded in the application. You have

uploaded the graphics to Oracle Cloud Infrastructure and only added the URL in the application. You need

to ensure these graphics are accessible without requiring any authentication for an extended period of

time.

How can you achieve these requirements?

A. Create pre-authenticated requests (PAR) and specify 00:00:0000 as the expiration time.

B. Make the object storage bucket private and all objects public and use the URL found in the Object "Details".

C. Make the object storage bucket public and use the URL found in the Object "Details".

D. Create PARs and do not specify an expiration date.

Correct Answer: C

Pre-authenticated requests provide a way to let you access a bucket or an object without having your own credentials. For example, you can create a request that lets you upload backups to a bucket without owning API keys. When you create a bucket, the bucket is considered a private bucket and the access to the bucket and bucket contents requires authentication and authorization. However, Object Storage supports anonymous, unauthenticated access to a bucket. You make a bucket public by enabling read access to the bucket. pre-authenticated requests have to select expiration date

QUESTION 3

Which two are true for Oracle Cloud Infrastructure DNS? (Choose two.)

A. It can function only as a primary DNS.

B. It supports other cloud providers such as AWS and Azure.

C. It supports segregation of traffic by using the private pool.

D. It does not provide DDoS protection.

Correct Answer: BC

References: B ?Support for Oracle Cloud Infrastructure, other Cloud provider endpoints (AWS, Azure) and private

assets, including Cloud, CDNs and Data Centers C ?Customers may purchase Oracle Cloud Infrastructure Private Pool and Vanity Nameserver to have their Domain Names and Zones under a private IP pool with dedicated nameservers to segregate from those of other customers in order to reduce the risk of external issues affecting their websites. https://www.oracle.com/cloud/networking/dns-faq.html

QUESTION 4

You are planning to deploy a multi-region web application in Oracle Cloud Infrastructure (OCI). You have customers in North America, Asia and Europe who will access the application. What service is available in OCI to help you choose the regions the lowest latency to these markets?

A. Internet Intelligence

B. FastConnect

C. IPsec VPN

D. DNS Zone Management

Correct Answer: A

QUESTION 5

Which statement Is true about Data Guard implementation in Oracle Cloud Infrastructure (OCI) bare metal and virtual machine database systems?

A. Primary and standby databases must be in the same OCI region.

B. Both database systems must be in the same compartment.

C. Database systems need not be the same shape type (e.g, primary database can be a virtual machine, and standby database a bare metal shape, and vice versa).

D. Primary and standby database versions and editions need not be Identical.

Correct Answer: B
