QUESTION 1

To monitor a database entity using Oracle Infrastructure Monitoring you need to _____.

A. Install a cloud agent and define the database host monitoring entity.

B. Install a cloud agent and define the database entity with this agent.

C. Only define database credentials.

D. Install a cloud agent, define required database monitoring credentials and define the database entity with this agent.

Correct Answer: D

QUESTION 2

When diagnosing a server response time issue using Application Performance Monitoring, what is the smallest sample period that you can select to display?

A. Last day

B. Last 15 mins

C. Last 60 mins

D. Last 6 hours

E. Last 10 mins

F. Last 1 min

Correct Answer: E

QUESTION 3

A customer wants an email notification sent when the performance of their enterprise application is poor. How should you configure and accomplish that function using the Oracle Management Cloud (OMC)?

A. Create an APM Alert Rule to send a notification when the request response time is longer than a predefined value.

B. Configure the IT Analytics Performance Analytics: Middleware dashboard to send application performance notifications.

C. Create a Log Analytics rule to send a notification when performance error occurs in the application server logs.

D. Create an OMC Alert Rule to send a notification when a page response time is longer than a predefined value.

E. Create an Application Performance Monitoring (APM) Application Definition to notify users when performance is below a predefined value.

Correct Answer: C

QUESTION 4

You need to confirm that deployment of the Application Performance Monitoring (APM) service was successful at a customer site. Which three steps should you perform? (Choose three.)

A. Verify the APM Agent directory structure.

B. Use the Application Performance Monitoring web user interface.

C. Examine the Data Collector directory structure.

D. Use the Oracle Cloud MyServices user interface.

E. Examine the APM Agent logs.

F. Examine the Gateway logs.

Correct Answer: BCE

QUESTION 5

You want to use machine learning to focus on threats against a specific database and its query execution activity, and the number and order of SQL executions performed by apps. Which two statements are true for using this model? (Choose two.)

A. Security model must be based on Authentication or Data Access.

B. Audit logs must be collected by Oracle Log Analytics.

C. Auditing must be enabled for the database to be used.

D. Database must be backed up before being added to the SQL Analysis Model.

E. Learning period can be selected only as days from time unit.

Correct Answer: BC
