QUESTION 1

At what point during an Application Performance Monitoring deployment should you configure the proxy communication for the APM agent?

- A. while downloading the mater install kit
- B. in the startup scripts for your application server
- C. when running AgentInstall.sh to provision the APM agent
- D. before running the install; set up the https_proxy environment variable

Correct Answer: D

Reference: <https://docs.oracle.com/en/cloud/paas/management-cloud/dmapm/installing-andconfiguringoracle-application-performance-monitoring.pdf> (p.65)

QUESTION 2

You need to confirm that deployment of the Application Performance Monitoring (APM) service was successful at a customer site. Which three steps should you perform? (Choose three.)

- A. Verify the APM Agent directory structure.
- B. Use the Application Performance Monitoring web user interface.
- C. Examine the Data Collector directory structure.
- D. Use the Oracle Cloud MyServices user interface.
- E. Examine the APM Agent logs.
- F. Examine the Gateway logs.

Correct Answer: BCE

QUESTION 3

You need to display a specific entity's log entries in the Oracle Log Analytics explorer. Which action should you perform?

- A. Select a Cluster chart in the Visualize panel and find your entity in the display.
- B. Drag the Entity data panel to the Visualize panel.
- C. Filter and select the entity name from the Entity field in the Data panel.
- D. Select the icon resembling an entity; it contains the host name.

Correct Answer: C

QUESTION 4

A customer wants an email notification sent when the performance of their enterprise application is poor. How should you configure and accomplish that function using the Oracle Management Cloud (OMC)?

- A. Create an APM Alert Rule to send a notification when the request response time is longer than a predefined value.
- B. Configure the IT Analytics Performance Analytics: Middleware dashboard to send application performance notifications.
- C. Create a Log Analytics rule to send a notification when performance error occurs in the application server logs.
- D. Create an OMC Alert Rule to send a notification when a page response time is longer than a predefined value.
- E. Create an Application Performance Monitoring (APM) Application Definition to notify users when performance is below a predefined value.

Correct Answer: C

QUESTION 5

A customer wants to identify trends for heap usage of a WebLogic Domain using Oracle Analytics. How should you demonstrate that capability?

- A. Keep a list of WebLogic servers in Excel and compare it to the trend of heap usage for each WebLogic in the domain
- B. Locate the Hosts where the Domain is distributed and then analyze the memory usage trend for each Host.
- C. Group WebLogic servers by Domain and select the domain group you are interested in for trend analysis.
- D. Locate and consolidate all the WebLogic log files and analyze each occurrence of a heap entry.

Correct Answer: C
