QUESTION 1

Your company wants to revise an existing sales order in Order Management Cloud to compensate the downstream legacy fulfillment system that does not allow any update to the already interfaced fulfillment lines.

What type of compensation pattern rule would you need to define for the orchestration process fulfillment step?

- A. Define one rule of type CREATE.
- B. Define one rule of type UPDATE.
- C. Define two rules: one of type CANCEL and another of type CREATE.
- D. Define one rule of type CANCEL_CREATE.

Correct Answer: C

A rule that you can set on an orchestration process step that specifies the adjustments to make when an order changes. Undo, Redo, Update, Cancel, and None are each an example of a compensation pattern. For example, assume the compensation pattern for a Create Shipment step is Redo, and that this step calls the Cancel service and the Create service. If Order Management receives a change order that includes a new warehouse for this step, then it runs the Cancel service and the Create service again.

QUESTION 2

A furniture retailer wants its online buyers to first choose their underlying need, which will then direct them to the related list of accessories and product parts of the configurable furniture product. The retailer intends to do this by presenting standard questions to the online buyers on their needs, and then presenting the related list of accessories and parts through dynamic user interfaces.

What step is required to enable this feature?

- A. Add a supplemental structure to the root node of the item-based model in the workspace area of the Configurator.
- B. Add a supplemental structure to the option classes of the item-based model in the workspace area of the Configurator.
- C. Add a supplemental structure to the root node of the item-based model in Fusion Product Hub, and then import it into the Configurator.
- D. Add a supplemental structure at the option class level for each model product in Fusion Product Hub, and then import it into the Configurator.

Correct Answer: A

QUESTION 3

Which step must be performed before enabling a new inventory organization in SCM cloud for collection from Manage Upstream and Downstream Source System Task?

- A. Add the Organization against the OPS destination system.
- B. Add the Organization against the OPS source system manually.
- C. Refresh the Organization List against the Oracle Planning and Sourcing (OPS) source system.
- D. Create a new source system for each organization.

Correct Answer: C

QUESTION 5

Your company is a manufacturer and distributor of CTO type of products globally, and uses Global Order Promising to promise its orders. You recently noticed that the promising results are determining the expected sources globally but not the least-cost ones. You want to understand the logic used by the GOP engine to derive the least-cost source.

Identify the four cost elements used by the cloud Global Order Promising engine to achieve the Profitable-to-Promise objective? (Choose four.)

- A. Cost of internal transfers between organizations
- B. Storage Cost (when the cost of holding that item in inventory is high)
- C. Overhead Cost
- D. Resource Consumption Cost (in case the end item is to be manufactured)
- E. Component Cost
- F. Standard Cost at internal organizations

Correct Answer: ADEF
