### QUESTION 1

Which statement is true about the definition of source systems in Functional Setup manager?

- A. All order capture and fulfillment systems are defined as Spoke systems.
- B. The Oracle Fusion order capture and fulfillment system is defined as Fusion.
- C. All external order capture systems are defined as Spoke systems and the Fusion fulfillment system is defined as Fusion.
- D. All external order capture systems are defined as Spoke systems and external fulfillment systems are defined as purchased.

Correct Answer: A

You can specify whether the source system is a spoke system, such as a legacy system, or a purchased system, such as data from a third party provider. Type can be only `Spoke` or `Purchased`. There is no type called `Fusion`.

---

### QUESTION 2

A revision was made to an existing sales order in Order Management Cloud. But it did not trigger a change order.

Identify the attribute that was modified during the revision of the sales order.

- A. Requested Ship Date
- B. Customer PO
- C. Unit Selling Price
- D. Ordered UOM
- E. Ordered Quantity

Correct Answer: B

---

### QUESTION 3

The warehouse manager of your company wants manual intervention to handle the allocated materials and to backorder the sales order lines in case of any physical discrepancies in the stock before pick confirmation. The warehouse manager wants to enforce manual picking followed by auto ship confirmation based on the picked quantity without any further manual intervention.

What is the correct shipment configuration to meet this requirement?

- A. Disable Auto Confirm Picks, deselect the check box "Create Shipments," and schedule the Create Shipment process.
- B. Disable Auto Confirm Picks and select the check box "Create Shipments" in Pick Wave Release Rule.

C. Disable Auto Confirm Picks, deselect the check box "Create Shipments," and schedule the Confirm shipment process.

D. Disable Auto Confirm Picks, select the check box "Create Shipments," and schedule the Confirm Shipment process.

Correct Answer: C

#### QUESTION 4

You are using the Check Availability feature to explore alternative ways of promising a batch of five fulfillment lines in simulation mode.

Which three attributes can you change to explore other promising options? (Choose three.)

A. Requested Quantity

B. Requested Ship-from warehouse

C. Requested shipping method

D. Allow substitute items

E. Requested ship date

F. Scheduled ship date

Correct Answer: BCD

The values for the attributes that begin with requested, such as the Requested Item attribute and the Requested Ship-from Warehouse attribute, are initially determined by what the values are when you select the line in the Order Orchestration work area. You cannot change the values for many of the requested attributes, such as the Requested Item attribute, the Requested Quantity attribute, and the Requested Ship Date attribute. You can change or clear the values for the Requested Ship-from Warehouse attribute and the Requested Shipping Method attribute. There are also some additional attributes you can change, such as whether substitutions are allowed, to influence the results when you explore other promising option.

#### QUESTION 5

You want to perform Internal Material Transfer across Business Units and want to capture internal margin as part of revenue for the selling Business Unit.

Which mandatory task would you perform for this requirement?

A. Configure Oracle Fusion Global Order Promising

B. Manage Consumption Rules

C. Manage Supply Execution Documentation Creation Rules

D. Manage Supply Chain Financial Orchestration Transfer Pricing Rules

E. Manage Supply Order Defaulting and Enrichment Rules

Correct Answer: D

Sourcing tools enable you to manually create internal material transfer requisition lines in Self Service Procurement and create supply requests from the Manage Item Quantity page. These sourcing tools provide a default source organization and allow access to source organization rankings and available to promise quantities. Oracle Fusion Supply Chain Orchestration works with Oracle Fusion Global Order Promising and Oracle Fusion Inventory Management to identify the source organization rankings based on pre-established rules.
