QUESTION 1

Which statement correctly describes Oracle Data Science?

- A. It is primarily focused on supporting a single data scientist.
- B. It enables data science teams to build, train, and manage machine learning models on Oracle Cloud.
- C. It provides management for on-premise machine learning models.
- D. Oracle's Data Science model catalog holds contains only the model artifact.

Correct Answer: C

QUESTION 2

Which is a common business problem for customers running Big Data workloads?

- A. Costs associated to process a large scale data set
- B. Cost associated with Disaster Recovery for large deployments
- C. Ability to process a small data set at the minimum cost as possible
- D. Ability to process a large data set at the maximum cost as possible

Correct Answer: A

QUESTION 3

A Linux visualization instance is in a public subnet with security list 0.0.0.0/0 for TCP port 22. What other rule do you absolutely need to be able to connect remotely?

- A. Open all protocols for your specific IP address.
- B. Create a Stateless Egress rule for port 22
- C. Open TCP ports 5900 to 5910 for 0.0.0.0/0.
- D. No other additional rules are needed. It is possible to connect as is.

Correct Answer: C

QUESTION 4

What three data sources can Oracle Data Science draw from?

- A. Google Cloud Object Storage

- B. Autonomous Data Warehouse
- C. On-premise Oracle database
- D. Azure Object Storage Blob
- E. AWS S3 buckets

Correct Answer: ABC

QUESTION 5

Oracle Cloud infrastructure (OCI) Block Volume Storage supports sharing a Block Volume among multiple compute Instances in read/write or read only shareable mode.

Which two file systems should be used to allow multiple compute Instances to read/write data concurrently without any data loss?

- A. Distributed File Systems like Gluster, OCFS2, GFS2
- B. Linux File Systems like XFS, EXT4, EXT3, etc.
- C. Network File System (NFS)
- D. Parallel File Systems like Lustre, IBM Spectrum Scale(GPFS), BeeGFS, etc.

Correct Answer: A
