QUESTION 1

Which TWO statements are true about the Oracle Zero Downtime command line? (Choose all correct answers)

- A. The `zdmcli migrate database` command can be run with no options as long as all the information is correctly specified in Zero Downtime Migration's (ZDM) response file.
- B. When the source database is a single instance database deployed on a non-Grid Infrastructure environment, the `sourcedb` option should be used to specify the database name.
- C. Upon executing the `zdmcli, migrate database` command, the only way to track the status of the migration is by querying the ZDM service using the provided job ID.
- D. The `-sourcedb` option is the only valid option to indicate the source database name.

Correct Answer: BC

QUESTION 2

Which developer tool can be used to load JSON documents to an Oracle database on the cloud?

- A. SQL Developer Web
- B. Modeler
- C. REST Data Services
- D. SQL Developer

Correct Answer: A

QUESTION 3
