- 😳 365 Days Free Update
- 800,000+ Satisfied Customers

### **QUESTION 1**

Which two components support in-database automatic machine learning (AutoML) functionality?

- A. OML4SQL
- B. OML4Py
- C. OML4R
- D. OML Services a
- E. OML AutoML UI
- F. Oracle Data Miner
- Correct Answer: BE

#### **QUESTION 2**

You have created a notebook and want to run the notebook on a periodic schedule. How should you achieve this?

- A. You cannot run the notebook on the scheduled time.
- B. You can create a job and schedule it to run a specific notebook.
- C. You have to login as the admin user and schedule a job to run the notebook.
- D. You need to contact the database administrator to configure the notebook to run at a particular time.

Correct Answer: B

#### **QUESTION 3**

Which two statements are true about Classification algorithms?

- A. They predict numeric values along a continuum.
- B. They extract rules using unsupervised learning.
- C. They assign cases to target categories.
- D. They require known outcomes to guide the learning process.

Correct Answer: AD

# **QUESTION 4**

Which statement is FALSE about Oracle Machine Learning (OML) Notebooks?

A. When visualizing a 1 million row database data using the built-in Zeppelin visualizers, OML will by default display the results on the entire table.

B. You can set the output format in SQL paragraphs of a notebook.

C. You can share notebooks with Import/Export operations.

D. Within notebook paragraphs you can switch between data views of tables, pie charts, bar charts, line plots and scatter plots.

Correct Answer: A

## **QUESTION 5**

You want to predict which customers are likely to increase spending if given an additional credit card. Your task is to build a model using demographic and aggregated credit card data for customers who have used similar cards in the past.

Which machine learning technique should you use to achieve this?

- A. Classification
- B. Regression
- C. Feature Extraction
- D. Attribute Importance

Correct Answer: D
