QUESTION 1

Which storage type is most effective when you want to move some unstructured data, consisting of images and videos, to cloud storage?

- A. Standard storage
- B. File storage
- C. Archivestorage
- D. Block volume

Correct Answer: A

Use Oracle Cloud Infrastructure Object Storage for data to which you need fast, immediate, and frequent access. Data accessibility and performance justifies a higher price point to store data in the Object Storage tier. The Object Storage service can store an unlimited amount of unstructured data of any content type, including analytic data and rich content, like images and videos.

<https://docs.oracle.com/en/solutions/learn-migrate-app-data-to-cloud/considerations-object-storage.html#GUID-AC192B08-5160-4DA7-B43E-001753D99CF1>

QUESTION 2

Which component helps move logging data to other services, such as archiving log data in object storage?

- A. Agent Configuration
- B. Unified Monitoring Agent
- C. Service Connector Hub
- D. Service Log Category

Correct Answer: C

Service Connector Hub Service Connector Hub moves logging data to other services in Oracle Cloud Infrastructure. For example, use Service Connector Hub to alarm on log data, send log data to databases, and archive log data to Object Storage. For more information, see Service Connector Hub. <https://docs.oracle.com/en-us/iaas/Content/Logging/Concepts/loggingoverview.htm>

QUESTION 3

You are part of security operation of an organization with thousand of your users accessing Oracle cloud infrastructure it was reported that an unknown user action was executed resulting in configuration error you are tasked to quickly identify

the details of all users who were active in the last six hours also with any rest API call that were executed. Which oci feature should you use?

- A. service connector hub
- B. management agent log integration
- C. objectcollectionrule
- D. audit analysis dashboard

Correct Answer: D

QUESTION 4

You want to make API calls against other OCI services from your instance without configuring user credentials. How would you achieve this?

- A. Create a dynamic group and add apolicy.
- B. Create a dynamic group and add your instance.
- C. Create a group and add a policy.
- D. No configuration is required for making API calls.

Correct Answer: A

DYNAMIC GROUP Dynamic groups allow you to group Oracle Cloud Infrastructure instances as principalactors, similar to user groups. You can then create policies to permit instances in these groups to make API calls against Oracle Cloud Infrastructure services. Membership in the group is determined by a set of criteria you define, called matching rules.

<https://docs.cloud.oracle.com/en-us/iaas/Content/Identity/Tasks/calling-services-from-instances.htm>

QUESTION 5

Which statement is true about standards?

- A. They may be audited.
- B. They are result of a regulation or contractual requirement or an industry requirement.
- C. They are methods and instructions on how to maintain or accomplish the directives of the policy.
- D. They are the foundation of corporate governance.

Correct Answer: B
