### QUESTION 1

To support a growing application workload, you need to scale out an existing (nondynamic) cluster. You power up the new hardware and install WebLogic server.

Which two changes are mandatory for you to make to your domain configuration?

- A. Create a new deployment plan.
- B. Create a new machine.
- C. Create a new server.
- D. Add a server to the cluster.
- E. Add a server to the machine.
- F. Add the cluster to the machine.

Correct Answer: BC

---

### QUESTION 2

You want to configure an LDAP authentication provider in your domain. Which three pieces of information must you obtain from your LDAP administrator? (Choose three.)

- A. name attribute for user objects
- B. connection pool maximum size
- C. base DN for group objects
- D. realm name
- E. host name and port

Correct Answer: CDE

---

### QUESTION 3

You start a managed server by running a start script at the command line. The server fails to start. To troubleshoot this failure, you look at the window in which the script ran. One of the messages from the server says: "boot identity not valid".

What do you do before running the script again?

- A. Add the option to the start script that allows servers to be started without credentials
- B. Update the credentials in the boot identity file

- C. Update the credentials in the start script
- D. Create a boot identity username and password by using the administration console
- E. The boot identity file does not exist. Create one.

Correct Answer: B

#### QUESTION 4

You are using WebLogic Server Diagnostic Framework (WLDF) Instrumentation in a system diagnostic module. The Dye Injection monitor is enabled. You know the diagnostic context ID of the request you are interested in that was processed by several. You are looking through the messages in the server log file of several.

Which statement is true?

- A. You need to look at the Events Data Archive. Server log files do not contain WL DF context IDs
- B. You need to look at the Harvested Data Archive. Server log files do not contain WL DF context IDs.
- C. You need to look at the domain log file. Only the domain log file contains WL DF context IDs.
- D. You can search the server log file for the context ID. Any message that was written to the log IDs during that request will contain the context ID.
- E. You need to translate the context ID into the corresponding transaction ID, which is the only ID in server log file entries.

Correct Answer: A

---

#### QUESTION 5

A new machine was given to your department. This machine has two WebLogic server 12.1.2 installation, each with different inventories.

Which command or tool do you determine the differences in products installed in each of the inventories?

- A. None, inventories are used by Oracle databases only.
- B. `ORACLE_HOME/wiserver/bin/compareInventory-sh-oracle-home1 -oraclehome2` .
- C. The Oracle Inventory Viewer utility
- D. `ORACLE_HOME2` .

Correct Answer: B
