QUESTION 1

Which session persistence type is invalid?

A. Async_replicated

B. async_jdbc

C. replicated

D. async_memory

E. cookie

F. file

G. replicated_if_clustered

Correct Answer: D

QUESTION 2

Consider a domain with an existing JDBC data source, which connects to an Oracle database. Your database administrator requests that the JDBC connections to this database now specify a different username.

Which data source attribute would you modify to implement this requirement?

A. Properties

B. Credentials

C. Username

D. Login

E. URL

Correct Answer: A

QUESTION 3

Which two metrics are used to monitor and troubleshoot unicast communication in a cluster?

A. Groups

B. Master

C. Backup server

D. Session Replicas

E. Local Group Leader

Correct Answer: AE

QUESTION 4

When creating a dynamic cluster, you have multiple options concerning how dynamic servers are distributed across machines in your domain. Identify three supported configurations.

A. Use a single machine.

B. Use all machines in a subnet.

C. Use all machines in the domain.

D. Use all percentage of machines in the domain.

E. Use all machines whose names match an expression.

Correct Answer: ACE

QUESTION 5

You require high availability for HTTP sessions in a web application. In addition, you have the following constraints:

·

There is little free memory on the machines hosting the cluster.

·

HA must be guaranteed even when multiple machines fall simultaneously.

·

You are not allowed to update the production databases schema.

A.

Database persistence

B.

File persistence

C.

In-memory replication

D.

Whole –server migration

Which is the best session persistence option?

Correct Answer: C
