QUESTION 1

Where would your customer go to find the latest Exadata patches?

- A. My Oracle support for database patches, ULN for OS patches and SUN Support for servers and InfiniBand patches.
- B. The Exadata owner guide.
- C. The patch database in my Oracle support.
- D. My Oracle Support note 888828.1.
- E. The database machine in Exadata storage server 11g release 1 (11.1) supported version (Doc ID: 835032.1).

Correct Answer: D

QUESTION 2

The Exadata compute node, exadbs04, has been having issues for some time. The server had to be repaired and you just received a new server. Your LVM snapshot was corrupt and now the compute node must be re-imaged with an Oracle Support installation image.

Which three tasks must be performed in order to re-image the compute node? (Choose three.)

- A. Create a CELLBOOT USB Flash Drive by using an external USB drive.
- B. Mount the LVM backup image across the network and recover the system.
- C. Remove exadbs04 from the RAC cluster and all associated Oracle Homes from the central inventory.
- D. Reboot the new server by using a bootable recovery image from the external USB drive.
- E. Reconfigure all site-specific settings (host name, IP addresses, NTP server, and so on).

Correct Answer: CDE

QUESTION 3

Which three statements are true about the Enterprise Manager setup in Exadata? (Choose three.)

- A. The Exadata Plug-In is automatically installed with EM Agent 12cR1.
- B. When installing Enterprise Manager after a Platinum Services installation, you should reuse the existing EM Agent.
- C. InfiniBand Switches are monitored remotely.
- D. Enterprise Manager creates a schematic of all servers and their health in the Exadata rack.

E. Enterprise Manager shows the health of individual ports on the InfiniBand Switches.

Correct Answer: CDE

QUESTION 4

Which two statements are true about metrics in the DBMCLI utility? (Choose two.)

- A. Metric values are computed and stored in memory, and then permanently stored on disk.
- B. DBMCLI can be used to report on Exadata storage server metrics.
- C. Metrics are reported as one of four types: cumulative, instantaneous, rate, or transition.
- D. Fields in AlertHistory cannot be modified.
- E. DBMCLI reported metrics are informational only and cannot be used to trigger alerts or reported events.

Correct Answer: AC
