QUESTION 1

When attempting to install Oracle Enterprise Manager agent software directly on an Exadata storage cell, you get an error.

What caused the error?

A. The Enterprise Manager agent software is installed only on the Enterprise Manager repository.

B. The Enterprise Manager agent software is not a supported version for the storage cell.

C. Additional software should not be installed on the Exadata storage cell.

D. The Enterprise Manager agent software should be installed by using the YUM repository.

Correct Answer: B

QUESTION 2

Your customer wants to load source information into a database. The source files are generated on a remote HP-UX system and need to be written to the Exadata system. The ideal solution would be to use a remote file system where an ACFS file system is exported to the HP-UX system.

Which three options are supported using ACFS on Exadata 12.1.0.2 and later?

A. SAMBA

B. NFS

C. HANFS

D. DBFS

E. ACFS is not supported on Exadata

Correct Answer: ABD

QUESTION 3

QUESTION 4

What are three Oracle recommended methods for migrating to Exadata with the least amount of down time? (Choose three.)

A. CTAS over a database link

B. Expdp and Impdp

C. Cross Platform Incremental Backup and Restore

D. logical migration by using RMAN and GoldenGate

E. physical migration by using Data Guard

Correct Answer: CDE

QUESTION 5

A customer has received an email notification about a temperature alert on one of the storage servers on their Exadata system.

What action can the customer take to further investigate the alert?

A. Log in to the Oracle database and query v$temperature.

B. SSH to the storage server and use the CeIICLI sensor_check command to get information about the storage server\\'s health.

C. Log in to the ILOM service processor and view the current status of the sensors and indicators on the system.

D. Enter the data center and immediately power off the storage server.

E. Run exachk to find the system component that might be having a problem.

Correct Answer: B
